SEED DEPARTMENT, 69 VAN HOUTEN STREET, PATERSON, N. J.

1908 MUZZY BROTHERS' ANNUAL CATALOGUE OF SEEDS 1908

ARTICHOKE.

German, Artichoke; French, Artichaut; Spanish, Albachofa.

	Per oz.	¼ lb.	Per lb.
French Globe	$0 35	$1 00	$3 00

The seeds should be sown early in the spring, in drills an inch and a half deep, and one foot apart. The next spring transplant to permanent beds, in rows or hills three feet apart and two feet between the plants. Plant in a deep, rich, moist loam, and the plants should be protected in winter by a covering of leaves or coarse manure. A bed will continue in bearing for several years.

ARTICHOKE—Jerusalem.

		Per qt.	Per peck
Tubers	3 lbs. by mail for $1.00	$0 20	$1 00

ASPARAGUS.

German, Spargel; French, Asperge; Spanish, Esparrago.

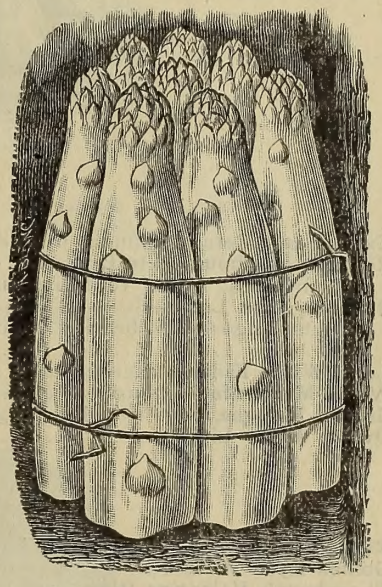
	Per oz.	¼ lb.	Per lb.
Columbia, producing pure white shoots	$0 10	$0 20	$0 60
Conover's Colossal	10	20	50
Palmetto, a light green variety	10	20	50
Roots, Colossal, Two years old, per 100	80	per 1000	6 00
" **Palmetto,** " " " "	80	"	6 00
" **Columbia,** " " " "	1 00	"	6 50

Sow the seed early in spring, in drills 15 inches apart, and about a dozen to the foot in the drill; keep the soil mellow and free from weeds during the summer, and in the succeeding spring transplant to permanent beds, which should be done in the following manner as described by a cultivator of Oyster Bay Asparagus.

"Plant on sand soil. To grow Asparagus in perfection, the soil need not necessarily be richer than it must be to produce a good crop of Corn. Some experiments have shown that by heavily manuring the crop cannot be made permanently greater than by moderate dressings. It is not desirable to plant them out very early; more plants will fail to grow than when the planting is deferred until the soil is dry and warm.

"In planting for private use, set out in rows two feet apart, and allow twelve inches in the row. Set the plants at least six inches below the surface. For market on a large scale, set four feet apart one way and two the other, which will allow the use of a horse and cultivator to keep the weeds under.

"If the plot is made sufficiently rich when the plants are set, they will make a large growth the first summer, and the shoots may be cut from them the succeeding year. Any well treated plot ought to produce a moderate crop the second year after planting. Remove the dead brush late in the fall or early in the spring of each year, and apply broadcast a dressing of manure. A plot of Asparagus will reach its maturity in its fifth or sixth year, after that the size of the shoots will diminish, but their numbers will increase."



Columbia White Asparagus.

BEANS—English or Broad.

German, Gartenbohne; French, Feve de Marais; Spanish, Hava.

	Per qt.	Per peck
Early Mazagan, prolific, very early	$0 30	$1 50
Broad Windsor	30	1 50
Sword Long-Pod	30	1 50

This class is very handy and should be planted as soon as the soil is in good state in the spring. Plant four inches apart and two inches deep, in drills four feet apart. To insure well-filled pods, pinch off the top as soon as the lower pods begin to set.

BEANS—Bush or Snap Varieties.

German, Bushbohnen; French, Haricots nains; Spanish, Habichuelas enanas.

	Per qt.	½ pk.	Per pk.	Per bu.
New Everbearing, earliest variety	$0 30	$1 00	$1 75	$6 00
Muzzy's Stringless Green Pod, the best stringless bean grown. Ten days to two weeks earlier than Valentine; pods full and fleshy, extremely crisp and absolutely stringless. Very productive	30	85	1 50	5 00
Livingston's ROUND POD Six-Weeks Bean	30	85	1 50	5 00
Early Valentine, early, productive, tender, and of excellent flavor	25	75	1 25	4 00
Early Mohawk, very productive and of good quality	25	75	1 25	4 50
Long Yellow Six-Weeks, early, excellent variety for general crop	25	75	1 25	4 50
Ne Plus Ultra, extra early variety for forcing, green flat pods	30	85	1 50	5 50

BEANS—Bush or Snap Varieties.—Continued.

Muzzy Stringless Green Pod.

	Per qt.	½ pk.	Per pk.	Per bu.
Extra Early Refugee, similar to late Refugee, pods two weeks earlier	$0 25	$0 75	$1 25	$4 25
Refugee, or Thousand to One, very early and prolific. The pods are round, full, stringless and of very fine quality	25	75	1 25	4 25
Burpee's Bush Lima—Beans as large as Large Pole Lima; stout growth, branches vigorously, bearing 50 to 200 large pods well filled with very large beans	35	1 25	2 25	8 00
Long White Kidney, excellent as a shell bean, greenor ripe	25	75	1 25	4 50
White Marrowfat, extensively grown for sale in the dry state	25	75	1 25	4 50
Golden Refugee, pods round and light color	30	85	1 50	5 50
Dwarf White Lima	35	1 25	2 00	7 00

DWARF WAX VARIETIES.

Refugee Wax, good for early or late, immense yielder	30	85	1 50	5 50
Golden-Eyed Wax, very early, prolific, free from rust	30	85	1 50	5 50
Thornburn's Valentine Wax, improved extra early Valentine, round wax pods	35	1 25	2 25	8 00
Wardwell's New Dwarf Kidney Wax, extra early, long pods, very productive	30	85	1 50	5 50
Black Wax or Butter Improved, very early and prolific. The pods are round, full, stringless; of very fine quality	30	85	1 50	5 50
Davis' White Wax, beans pure white pods, yellow, tender, rich	30	85	1 50	5 50
Golden Wax. This valuable variety is about ten days earlier than the Dwarf Black Wax, pods large, long, brittle, entirely stringless	30	1 00	1 75	6 00
Yosemite Mammoth Wax, the largest pods of all Wax Varieties	50	1 75	3 00	10 00
Flageolet Wax Red, pods large and very tender	30	1 00	1 75	6 00
Algerian Wax, very productive, round pods	30	1 00	1 75	6 00
Detroit Wax, similar to Golden Wax, less rust	30	85	1 50	5 50

Golden Wax Beans.

BEANS—Pole or Running Varieties.

German, Slaugenbohnen; French, Haricots a rames; Spanish, Judlos.

	Per qt.	½ pk.	Per pk.	Per bu.
Challenger Lima, potato variety, five and six in a pod	$0 35	$1 25	$2 00	$7 50
King of Garden Lima, vigorous in growth and immensely productive, pods large, numerous and well filled and beans of an enormous size. Generally grown for main crop	35	1 25	2 00	7 50
New Early Jersey, very early	30	1 00	1 75	6 50
Large White Lima, a greatly esteemed variety	30	1 00	1 75	6 50
Dreer's Improved Lima, This variety has proved to be a decided acquisition.	35	1 25	2 00	7 00
Kentucky Wonder, or Old Homestead Extra Early, pods round, long, tender and good flavor, very productive	30	1 00	1 75	6 50
Dutch Case Knife, a very productive variety, and one of the earliest	30	1 00	1 75	6 00
Horticultural or Speckled Cranberry, a popular variety for private use, equally serviceable in the green state or when shelled	30	1 00	1 75	6 00
Scarlet Runner, beautiful scarlet flowers; for ornamental and table use	30	1 00	1 75	6 00
Black Wax, pods long, thick and fleshy; pale yellow color; waxy appearance; very productive and tender; excellent as a snap or shelled green	30	1 00	1 75	6 50
Mont D'or, Golden Wax pods; early	30	1 00	1 75	6 00

Yard Long French, pods sometimes grow from 2 to 3 ft. long, are very slender like a pipe stem, should be grown on pea brush. Pkg. of 1 gill 25c.

Sow Bush sorts in drills about two feet apart, and drop the beans about three inches apart in the drills; cover two inches or less; for a succession, sow at intervals of two weeks. Lima beans should not be planted until settled warm weather; make rich hills, four feet apart each way; set a pole eight or ten feet high in each; press the beans into the soil eye down, six or eight to each pole, and when they are well up, thin out to four. A quart of Limas is sufficient for 75 or 80 hills, and a quart of Bush Beans will sow a row 100 feet long.

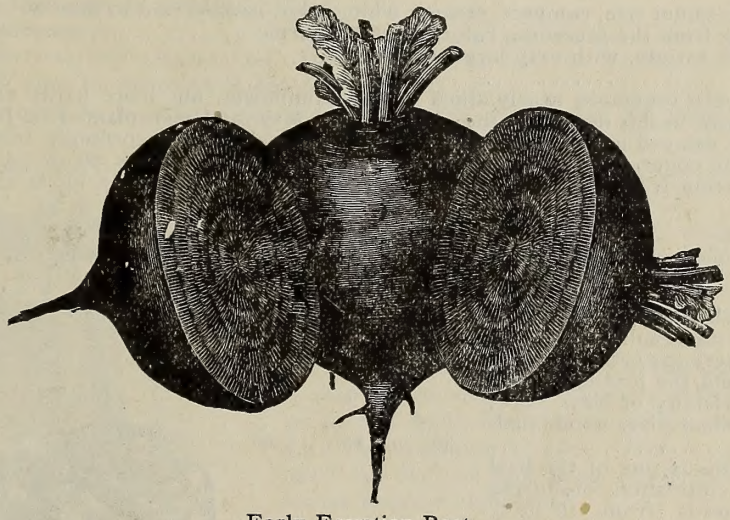
BORAGE.

German, Borritch; French, Bourrache; Spanish, Berraja.

	Per oz.	¼ lb.	Per lb.
Used as a pot herb; also as a salad, or can be boiled, and also for garnishing, but chiefly required for claret cups and other cooling drinks. Bees are very partial to the flower	$0 10	$0 30	$1 00

BEETS.

German, Runkelrub; French, Beterave; Spanish. Remolacha.



Early Egyptian Beet.

	Per oz.	¼ lb.	Per lb.
Detroit Dark Red, a splendid beet for market or home use, of a deep red color, tender and of delicate flavor	$ 10	$0 20	$0 60
Dark Red Egyptian, the earliest beet in cultivation, color deep crimson; of excellent quality	10	20	50
Extra Early Eclipse, very early, good size	10	20	50
Early Flat Bassano, chiefly valuable for its earliness	10	25	50
Early Blood Turnip, standard Early sort, an excellent variety	10	20	50
Edmand, market garden variety, uniform shape, dark	10	20	60
Dewing's Blood Turnip, of fine form and flavor	10	20	50
Bastian's Blood Turnip	10	20	50
Long Smooth Blood Red, an excellent late variety	10	20	50
Swiss Chard, used for its leaves, which are cooked as spinach	10	20	50

BEETS—Continued.

MANGEL-WURZEL AND SUGAR.

Varieties used for feeding **stock.** Sow 6 lbs. per acre.

	Per oz.	¼ lb.	Per lb.
Mammoth Red Mangel-Wurzel, producing roots of mammoth size, very regular, and with a small top. 10 lbs. and over, 25c. lb	$0 10	$0 15	$0 30
Yellow Globe Mangel-Wurzel, roots very large and globular, 10 lbs. 25c	10	15	30
Long Yellow Mangel-Wurzel, good for general crop. 10 lbs. at 25c	10	15	30
Golden Tankard Mangel-Wurzel, a new and very valuable variety of fine form and of sweet flavor, bright yellow in color, when cut it shows the interior rings similar to most varieties of garden beet. 10 lbs. at 35c.	10	15	40
White Silesian Sugar Beet, extensively grown for feeding stock and the manufacture of sugar	10	15	25
Vilmorin's Improved Sugar Beet, an improved variety	10	15	35
Lane's Improved Sugar Beet, improved variety of the French Sugar Beet, obtained by careful selection in this country. 10 lbs. and over 25c	10	15	30

A rich, deep open soil is the best suited to the culture of Beets; fresh manure is undesirable, but land that has been well manured the previous year is highly suitable. For an early supply sow in spring as soon as the ground becomes fit to work, in drills about one foot apart and two inches deep. For main crop sow the first week in May, and for winter use sow in June. When the plants have obtained three or four leaves, thin out, so that they may stand eight or nine inches apart. Keep free from weeds by hand weeding and hoeing. Those intended for winter use may be taken up in October, and stored in dry sand, in the cellar or outhouse. Before storing leaves and fibres must be trimmed off, but care must be taken not to bruise the main root.

BRUSSELS SPROUTS.

German, Sprossen-Kohl; French, Chou de Bruxelles; Spanish, Berza de Brusels.

	Per oz.	¼ lb.	Per lb.
Improved Seed, (French)	$0 20	$0 50	$1 50
Dwarf Improved, a variety producing compact sprouts of excellent quality	20	50	1 75

A tender delicious vegetable. The plant grows two or three feet high, and produces from the sides of the stalk numerous little sprouts, one or two inches in diameter, resembling cabbages. The leaves, which look like the Savoy, should be broken down in the fall, to give the little cabbages room to grow. They are very tender and sweet after early frosts. Sow early in hot-beds, or in seed-beds in May, transplant and cultivate like cabbage.

BROCCOLI.

German, Spragel Kohl; French, Chou Brocoli; Spanish, Broculi.

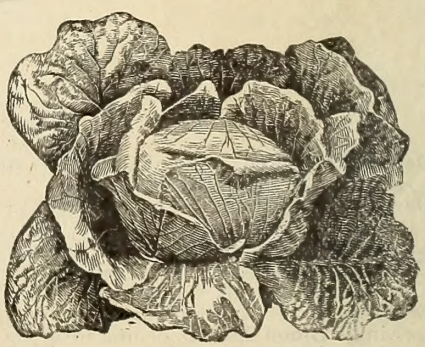
	Per oz.	¼ lb.	Per lb.
Early White, heads medium size, compact, creamy white color, most certan to head	$0 25	$0 75	$2 50
Purple Cape, differing from the preceding color, greenish purple	40	1 25	4 00
Walcheren, a valuable variety, with very large, firm heads	40	1 25	4 00
Mammoth White,	35	1 00	3 00

A favorite European vegetable, nearly allied to the Cauliflower, but more hardy and surer to head; the seed should be sown in this district in the early part of May, and transplanted in June, farther south the sowing should be delayed until June or July, and the transplanting accordingly from August to October. In parts of the country where the thermometer does not fall below 20 or 25 degrees, broccoli may be had in perfection from November until March. It succeeds best in a moist and rather cool atmosphere.

CABBAGE.

German, Kopfkohl; French, Chou; Spanish, Berza de reppollo.

	Per oz.	¼ lb.	Per lb.
Etampes, early French variety, with pointed heads	$0 20	$0 50	$1 50
Express, very early, small solid heads	20	50	1 50
All Seasons, fine variety for second early or late growing; good size	15	40	1 25
Early Jersey Wakefield, the leading variety for market in the vicinity of New York; very early, of medium size, good quality, sure to head	30	85	3 00
Early Flat Dutch. This is one of the best early cabbages in cultivation, producing large, compact heads from 10 to 12 pounds and upwards in weight and of excellent quality	20	60	2 00
Early Summer, a valuable early sort, resembling the Early Flat Dutch	20	60	2 00
Early Winnigstadt, heads large, one of the best for general use	15	40	1 25
Large York, larger and later than the Early York	15	60	1 00
Fottler's Improved Brunswick, This is the very fine second early variety	20	60	2 00
Henderson's Succession, a second early and late variety, a sure header; seeds sown in March produce large heads in June	25	75	2 50



All Seasons Cabbage.

CABBAGE—Continued.

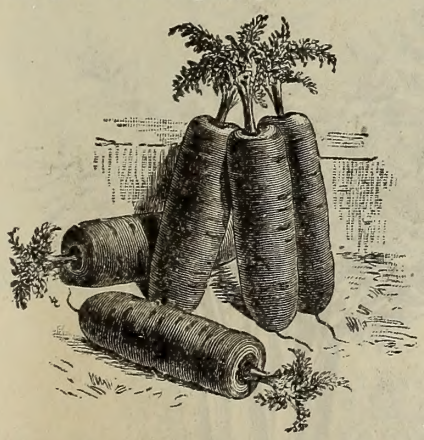
	Per oz.	¼ lb.	Per lb.
Danish Ballhead, Large, round, extremely solid heads; sweet flavor and crisp, tender texture. Sure header in dry as well as wet seasons. Nothing finer for the market gardener or private grower	$0 25	$0 75	$2 50
Large Late Drumhead, an excellent fall and winter variety, grows to a large size, with round, compact heads	20	60	2 00
Large Late Flat Dutch, the most popular variety for late cultivation. Large solid heads, broad and flat on top, best to keep	20	60	2 00
Red Stone Head, used almost exclusively for pickling	25	75	2 50
Drumhead Savoy (American) the largest heading sort, of excellent flavor	20	60	2 00

For very early use plant in the Autumn, from 10th to 25th September, in a seed-bed, and protect in cold frames during the winter, being careful to set them down to the first leaf. Transplant in the following spring as soon as the soil will admit. For autumn and winter use, plant in the seed-beds in May and early part of June, and when six inches high transplant into rich soil, two feet apart each way for the early varieties, and three by two and a half feet for the large winter varieties. To secure the best results, the soil should not be too dry, but should be thoroughly enriched, and the crop should be hoed at least once in ten days. Sow in heat early in spring, seed of the early kind for a second crop; also the late varieties for winter use.

CARROT.

German, Moehren; French, Carotte; Spanish, Zanah

	Per oz.	¼ lb.	Per lb.
Early French Forcing, the earliest variety, valuable for forcing; root small and of fine flavor	$0 15	$0 35	$1 25
Early Round Parisian, small, for frames or open ground	15	35	1 25
Early Scarlet Horn, an old and favorite sort, much esteemed for early summer	10	25	80
Half Long Danvers, a variety intermediate in size and period of maturity between the preceding and the Long Orange	10	25	75
Half Long Stump-Rooted Chantenay, like Nantes, broader shoulder	10	25	80
Half Long Pointed	10	25	80
Half Long Stump Guarande or Oxheart	10	25	80
Half Long Stump Nantes	10	25	80
Carentan, a new early variety without core. It is an excellent sort for forcing, or used as an early kind for planting in the open ground	15	30	1 00
Long Orange Improved, roots of large size, equally adapted for garden or farm culture	10	20	60
Large White Belgian, grown almost exclusively for stock	10	20	50



Nantes Carrot.

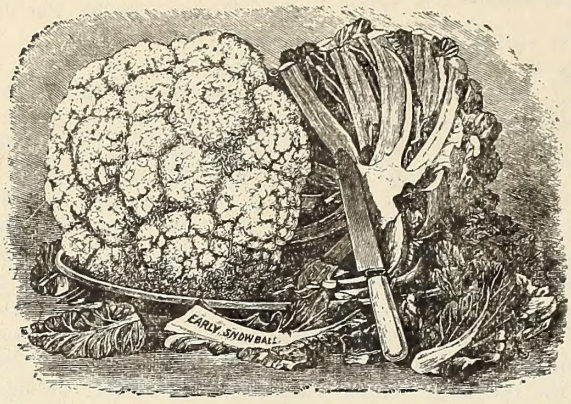
The Carrot, like other root crops, delights in a sandy loam, deeply tilled. It should never be sown on newly manured ground as forked roots are sure to be the result. It is best to sow on ground that has been well manured the previous year for some other crop, such as Celery, Potatoes, Onions or Peas, but avoid such crops as Cabbage and Turnips, or any of the tap rooted sections. For early or main crops sow the latter part of April; for later crops they may be sown any time until the beginning of June. Sow in rows about 15 inches apart and half an inch deep, thinning out to three or four inches between the plants.

CAULIFLOWER.

German, Blumen-Kohl; French, Chou-fleur; Spanish, Coliflor.

	Per pkt.	Per oz.	¼ lb.	Per lb.
Extra Early Dwarf Erfurt, short stem; fine	$0 25	$2 25		
Extra Early Paris. This is one of the earliest and best varieties, heads large, white and compact, of fine quality	10	60	$1 75	$6 00
Early Snowball, admirable for forcing, very solid, pure white heads	25	2 25		
Large Early Dwarf Erfurt, the earliest and best of all varieties for forcing	25	2 25		

CAULIFLOWER—Continued.



Snowball Cauliflower.

	Per oz.	¼ lb.	Per lb.
Lenormand's Short-Stemmed a late variety, producing very large well-formed heads of superior quality, 10c. per pkt.	$0 60	$1 75	$6 00
Algiers, popular late variety, sure to head, excellent for market, 10c. per pkt	60	1 75	6 00
Early London, 5c. pkt	30	1 00	3 50

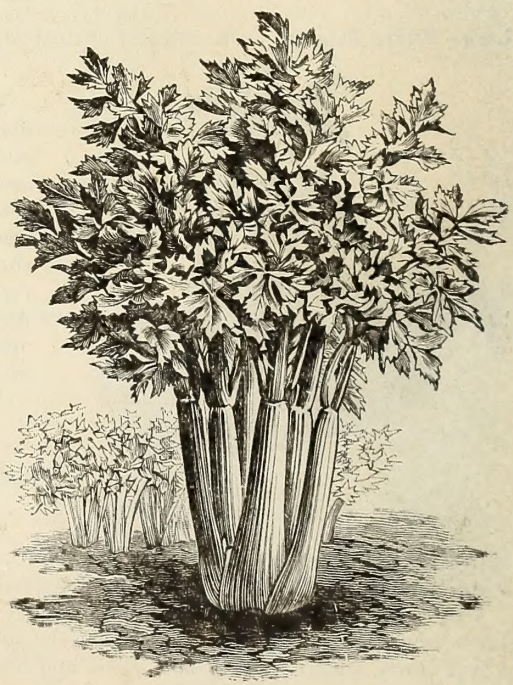
Cauliflower delights in rich, moist soil, and in dry seasons should be abundantly watered. The seeds may be sown in September and wintered over in the same manner as described for early cabbage. Where this is not practicable, it may be had nearly as well by sowing the seed in the hot-bed in January or February and transplanting the plants at two to three inches apart in boxes, or in the soil of another hot bed, until such time as they are safe to be planted in the open ground, which, in this latitude, is usually from the 15th of March to the 10th of April. If properly hardened off, they are seldom injured by being planted out too early.

CELERY.

German, Seleri; French, Celerei; Spanish, Apio.

	Per oz.	¼ lb.	Per lb.
Thorburn's Fin de Siecle	$0 20	$0 60	$2 00
Rose Ribbed Self-Blanching, a sport of Golden Self-Blanching; very choice	35	1 00	3 00
Evans' New Triumph, solid and crisp, fine nutty flavor	20	60	2 00
Giant Pascal, stalks very large, thick and crisp	20	60	2 00
Golden Self-Blanching, similar to White Plume, much larger in growth	35	1 00	3 00
Large Ribbed Kalamazoo, half dwarf White, solid	20	50	1 50
White Plume, requires very little banking	25	75	2 50
Pink Plume, similar to White Plume, stalks tinged with pink, good keeper	25	75	2 50
Golden Heart, one of the best for market or private use	20	60	2 00
Sandringham Dwarf White, Soup Celery, an imported variety of fine flavor; soup greens	20	50	1 50
Boston Market, an excellent dwarf, growing white variety	20	60	2 00
Covent Garden Rose, pink variety, good flavor	20	60	2 00
Celery Seed for Flavoring (old seed)	05	10	25

The seeds may be sown in the open ground in April, as soon as the ground can be nicely worked. Sow about half an inch deep, and be careful to firmly press the soil over the seed; this should be done by treading over the rows with the feet after sowing; this prevents the air drying up the seed, which thereby loses its vitality and fails to germinate. Many valuable crops are annually lost by inattention to this important particular. After the seed is up, keep carefully clear of weeds until the time of planting, June and July; the tops may be shorn off once or twice before planting; this makes them "stocky" and they suffer less in being transplanted. After the ground has been well prepared, plant in rows from three to four feet apart, according to the variety, setting the plants about six inches apart and pressing the soil firmly about the roots; keep free from weeds until the plants are able to take care of themselves. Earth up gradually during their growth, keeping the leaf stalks close together, so that the soil does not get between them. The soil best suited for Celery is a rich, moist loam.



COLLARDS—Georgia Grown.

German, Blatter-Kohl; French, Chou Cabu; Spanish, Cabu.

	Per oz.	¼ lb.	Per lb.
Sow seeds as for Cabbage in June, July and August, for succession. Transplant when one month old in rows a foot apart each way, and hoe often	$0 10	$0 25	$0 75

Chicory.

CHICORY.

Ger., Chicorie; French, Chicoree Saur; Spanish, Escorola.

Common, This variety produces the "Barbe de Capucin," a salad much used in France. Sown in June the roots are transplanted in autumn into sand in a cellar; the shoots which will come up soon form the "Barbe de Capucin."
Oz., 10c.; ¼ lb., 30c.; lb., 90c.

Large Rooted, Used to mix with or a substitute for coffee. Cultivation same as the carrot.
Oz., 10c.; ¼ lb., 30c.; lb., 90c.
See also Endive.

CHEVRIL.

Ger., Bisenlauch; French, Cerfeuil; Span., Cerafolio

	Per oz.	¼ lb.	Per lb.
Curled	$0 10	$0 30	$1 00
Common or Tuberous Rooted	10	50	1 50

The young leaves are used in soups and salads. Sow thinly in May, in drills half an inch deep, one foot apart.

CELERIAC.

German, Knob-Seleri; French Celery Rave.

Prague, or Turnip Rooted.

Per oz.	¼ lb.	Per lb.
$0 20	$0 50	$1 50

Apple Celeriac, An improved variety, nearly round.

Per oz.	¼ lb.	Per lb.
20	$0 50	$1 50

Celeriac.

A variety of Celery having turnip shaped roots, which may be cooked and sliced, and used with vinegar making a most excellent salad. It is more hardy, and may be treated in the same manner as celery.

Corn Salad.

CORN SALAD OR FETTICUS.

German, Ackersalat, Lammersalat; French, Mache; Spanish, Macha Valereanilla.

	Per oz.	¼ lb.	Per lb.
Large Seeded	$0 10	$0 20	$0 60
Lettuce Leaved,	15	25	75
Small Seeded,	10	20	60

Corn Salad, Fetticus, or Lambs Lettuce is used to a considerable extent as a salad. It is sown on the first opening of spring in rows one foot apart, and is fit for use in six or eight weeks from the time of sowing. If wanted to come out early in spring, it is sown in September, covered up with straw or hay as soon as cold weather sets in, and is wintered over the same way as Spinach.

CORN—Sweet.

German, Zucker Welshkorn; French, Maise de Sucre; Spanish, Maiz de Azucar.

Early Champion Market Sweet Corn.

EXTRA EARLY VARIETIES.

	Per ear	100 ears	Per qt.	½pk.	Per pk.	Per bu.
Golden Bantam Extra Early. Yellow, very sweet and tender			35	$1 25	$2 00	$7 00
Early White Cory, Earliest grown, fit for use 60 days after planting. Very sweet, good size, white cobs	$0 05	$4 00	30	85	1 50	5 00
Perry's Hybrid, very early and of large size; extra early	05	4 00	30	85	1 50	5 00
Early Minnesota, very early; ears fairly sized and uniform plant rather dwarf; one of the best early kinds; extra early	05	4 00	25	75	1 25	4 50
Early Marblehead, very early; ears good size, extra early	05	4 00	25	75	1 25	4 00

SECOND EARLY OR INTERMEDIATE.

	Per ear.	100 ears.	Per qt.	½ pk.	Per pk.	Per bu.
Early Champion, Large ears, very sweet and productive. The earliest large sort grown and fine for either home or market use	$0 05	$4 00	$0 30	$0 85	$1 50	$5 00
Early Mammoth, large and not very late; general crop	$0 05	$6 00	$0 35	$1 25	$2 00	$7 00
Crosby's Early Sugar, early sorts; ears short, from 12 to 16 rows, second early	05	4 00	30	85	1 50	5 00
Moores Early Concord, ears large and well filled from 12 to 20 rows; second early	05	4 00	30	85	1 50	5 50
Livingston's Evergreen, a second early variety, resembling Evergreen; general crop	05	6 00	35	1 25	2 00	7 50
Columbus Market, Large and for second early	05	4 00	30	85	5 50	5 00
Triumph, excellent medium early, large size, rich, sweet; good for market; general crop	05	4 00	30	1 00	1 50	5 00

GENERAL CROP AND LATE.

Stowell's Evergreen, a late variety, of excellent quality, remaining longer in the green state than any other; general crop	05	6 00	35	1 25	2 00	7 50
Hickox Improved, a new variety of superior excellence, is 12 rowed, straight and handsome; a superior market kind; general crop	05	4 00	30	85	1 50	5 50
Mammoth Sugar, a late variety of large size, very sweet and immensely productive. A leading variety	05	6 00	35	1 25	2 00	7 50
Country Gentleman, the sweetest and most tender of all sweet corn, late crop	05	5 00	35	1 25	2 00	7 50
Moonachie, very sweet, well-filled ears and productive; general crop	05	6 00	35	1 25	2 00	7 50
Sweet Fodder, for ensilage	Price on application.					

Sweet Corn may be either sown in rows, four and a half feet apart, and the seeds planted at about eight inches in rows, or planted in the hills, at distances of three or four feet each way, according to the variety grown, or the richness of the soil in which it is planted. The taller the variety or the richer the soil, the greater should be the distances apart. The first plantings in this vicinity are made about the middle of May, and successive plantings every two or three weeks until the first week in July. In more southern latitudes planting is begun a month earlier and continues a month later.

FIELD CORN.

	Qt. shelled	Per 100 ears	Bush. shelled
Mastodon Dent, very early strong growing	$0 15	$2 00	$1 50
Pride of the North, (Dent) very early	20	2 00	2 00
Leading Yellow, (Dent) early	15	2 00	1 50
King Philip Early, Red Kernels	20	2 00	2 00
Champion White Pearl,	15	2 00	1 50
Early Canada, yellow kernels,	15	2 00	1 75
Mammoth White Surprise, large dented	15	2 00	1 60
Large Yellow Flint,	20	2 00	2 00
Large White Flint	15	2 00	1 75
Chester County Mammoth, large, late yellow dent	15	3 00	1 50
Southern Horse Tooth, for fodder	Price on application.		
Sweet Fodder,	Price on application.		
Pop Corn,	per lb., 10c.; per 100 lbs., $5.00		

CRESS.

German, Kress; French, Cressen; Spanish, Mastueroz.

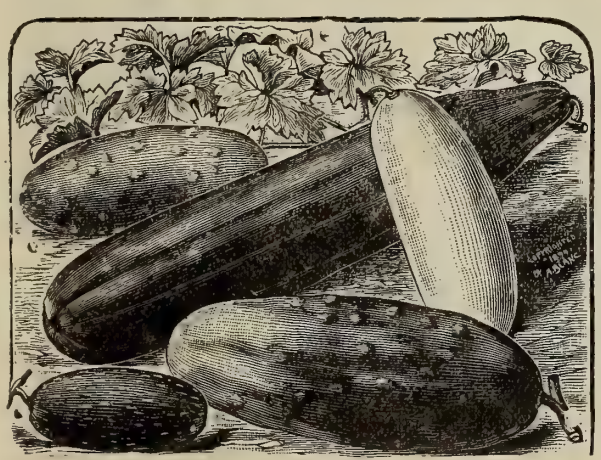
	Per oz.	¼ lb.	Per lb.
Curled Cress or Peppergrass	$0 10	$0 20	$0 40
Water Cress	30	1 00	3 50

Are excellent for small salads; the leaves while young have a warm, pungent taste. They can be used alone or mixed with Lettuce, Mustard, or other salad plants. Sow thickly at frequent intervals for succession, and treat in the same manner as Mustard.

CUCUMBER.

German, Gurken; French, Concombre; Spanish, Pepino.

	Per oz.	¼ lb.	Per lb.
Cumberland, The best pickling sort yet introduced, very handsome and productive, flesh fine but very crisp and tender	$0 10	$0 25	$0 75
Fordhook Pickling, Prolific, medium size, skin thin	10	25	75
Cool and Crisp, very prolific; good for pickling and slicing	10	25	80
Thorburn's Everbearing, small size; very early and productive	10	25	80
Japanese Climbing, can be trained on trellis, or grown on the ground. Skin smooth, dark green; flesh pure white, crisp and of mild flavor	15	30	1 00
Nichols' Medium Green, a valuable and handsome variety, in shape between White Spine and Long Green, an excellent sort for pickles and useful for forcing. Very prolific, fruit straight and smooth, color dark green, fresh, tender and crisp	10	25	80
Improved Early White Spine, the best table variety; grows uniformly straight and smooth; dark green; tender and excellent flavored	10	25	80
Peerless White Spine, a new variety of the preceding; average length 10 inches; full at both ends; deep green, holding color until mature	10	25	80
Talby's Hybrid, a cross between the Early White Spine and an English Frame variety, combining the hardiness of the first with the beauty and size of the latter	10	25	80
Early Green Cluster, a short, prickly, slender variety, bearing in clusters near the root. It is a great bearer	10	25	75
Early Short Green, the standard for pickling, medium size, straight and handsome. It makes a beautiful pickle that keeps well	10	25	75
Long Green, a very excellent variety; a good bearer; about a foot in length, rather pointed at both ends; dark green, firm and crisp	10	25	80
Green Prolific Pickling, very prolific, and said by those who have tested it is equally desirable as a market Cucumber	10	25	75
West Indian Gherkin or Burr, a very small oval-shaped prickly variety. It is grown exclusively for pickling, and should always be pickled when young and tender	20	50	1 50



Cucumbers.

Cucumbers succeed best in warm, moist, rich loamy ground. They should not be planted in the open air until there is a prospect of settled warm weather. Plant in hills about four feet apart each way. The hills should be previously prepared by mixing thoroughly with the soil in each a shovelful of well rotted manure. When all danger from insects is past, thin out the plants, leaving three or four of the strongest to each hill. The fruit should be plucked when large enough, whether required for use or not, as if left to ripen on the vines, it destroys their productiveness.

English Frame Cucumber—Per pkt., 25 cts.

Improved Sion House. Telegraph. Giant of Arnstadt. Duke of Edinburgh. Gen. Grant. Long Gun. Carter's Tender and True. Swan Neck. Blue Gown.

These varieties are for growing in hotbeds, or in houses particularly constructed for forcing, so that a supply can be furnished during the winter months, at which time the prices are very remunerative. Sow seeds in November, December or January, according to the time they are wanted for market, taking care to give plenty of air and water. It will be necessary to fertilize the pistillate flowers with the staminate in order to render the vines productive, as owing to the absence of insects they will not produce a crop under glass as in the ground, where bees and other insects have free access to the flowers.

Dandelion.

DANDELION.

German, Pardelblume; French, Pisse en-lit; Spanish, Armagon.

	Per oz.	¼ lb.	Per lb.
Thick Leaved	$0 40	$1 25	$4 00
Best French	25	75	2 50
Endive Leaved, new	50	1 50	5 00

The Dandelion is much used for spring salads and resembles Endive. Sow the seed in May or June in drills half an inch deep and 12 inches apart. The plants will be ready for use the following spring.

ENDIVE or CHICORY.

German, Endevien; French, Chicoree; Spanish, Endivia.

	Per oz.	¼ lb.	Per lb.
Green Curled Winter, very hardy; leaves dark green, tender and crisp	$0 15	$0 30	$1 00
Broad-Leaved Batavian (Escarolle), chiefly used in soups and stews; requires to be tied up for blanching	15	30	1 00
Early White Curled (Self-Blanching), the best variety, grows to a large size; very large and tender	15	30	1 00
Moss Curled Early Summer, used for salads same as winter varieties	15	35	1 25

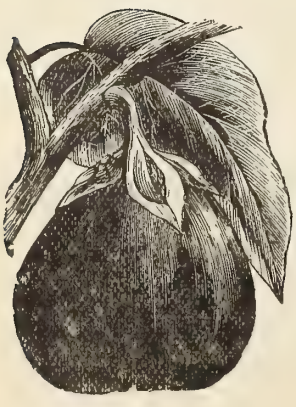
Endive is one of the best salads for fall and winter use. Sow for an early supply about the middle of April. As it is used mostly in the fall months, the main sowings are made in June and July, from which plantations are formed at one foot apart each way in August and September. It requires no especial soil or manure, and after planting is kept clear of weeds until the plant has attained its full size, when the process of blanching begins. This is effected by gathering up the leaves and tying them by their tips in a concal form with bass matting. This excludes the light and air from the inner leaves, which in the course of three to six weeks, according to the temperature at the time, become blanched. Another and simpler method consists in covering up the plants as they grow, with slats or boards, which serves the same purpose by excluding the light as the tying up.

Green Curled Endive.

EGG PLANT.

German, Eiepflanze; French, Aupergine; Spanish, Bereinfiena.

	Per oz.	¼ lb.	Per lb.
Pearl White, very fine grain and well flavored (Per pkt., 10c.)	$0 30	$0 85	$3 00
New York Improved, a superior market variety of large size and fine quality	40	1 25	4 00
Early Long Purple, early, of easy culture, hardy: productive; excellent for table	25	75	2 50
Early Dwarf Purple, medium size	35	85	3 00
Black Pekin, a fine variety, bearing large round, deep purple fruits, fine grained and of superior quality	30	85	3 00



New York Egg Plant.

The Egg Plant is a tender vegetable, and must not be planted out until the weather is warm and settled. Sow early in spring in hotbeds, or if these are not convenient, sufficient plants may be raised for a small garden by sowing a few seeds in common flower pots or in boxes in the house. Plant out early in June from two to three feet apart.

KALE.

German, Blatter-Kohl; French, Chou Vert; Spanish,Breton.

	Per oz.	¼ lb.	Per lb.
Siberian German Greens or "Sprouts." This variety is extensively used for early greens for which it is sown in the fall, in rows one foot apart, and treated in the same manner as Spinach; it is ready for use in early spring. Sowing can also be made in spring	$0 10	$0 20	$0 60
Dwarf Green Curled Scotch, a beautifully fringed, dwarf growing kind, with bright green leaves	10	25	75
Tall Green Curled Scotch, tall growing, very hardy variety, leaves a bright green, beautifully curled	10	25	75
Tall Brown German Curled, a very hardy and useful variety	10	30	90
Dwarf Brown German Curled,	10	30	1 00

Kale may be grown in almost any soil, but the richer it is the more abundant the product. Sow early in the spring, in prepared beds, covering the seeds thinly and evenly; transplant in June, and treat in the same manner as for Cabbage. Of all the Cabbage tribe this is the most tender and delicate, and would be much more extensively grown than it is if its excellent qualities were generally known. The varieties are all extremely hardy, and are best when touched by frost.

SEA-KALE.

German, Seekohl, Meerkohl; French, Crambe Maritime; Spanish, Breton de Mar.

	Per oz.	¼ lb.	Per lb.
Sea-Kale Seeds, very much like Celery	$0 30	$0 85	$3 00

Cultivate for its blanched shoots, which are cooked in the same way as Asparagus. A supply may be had all winter by planting the roots closely in warm cellar before frost. Sow one inch deep in drills two feet apart; thin out to six inches, and the next spring plant in hills three feet apart, three plants in each.

Early Vienna Kohl-Rabi.

KOHL-RABI.

German, Kohl Rabi; French, Chou Rave; Spanish, Colinabo.

	Per oz.	¼ lb.	Per lb.
Early White Vienna, flesh white and tender; best market sort; good for table use	$0 20	$0 60	$2 00
Early Purple Vienna, differing from the above in color, which is of a bluish purple	25	75	2 50

Kohl-Rabi, or Turnip-stemmed Cabbage, is a vegetable that is not so much cultivated as it deserves to be. The stem above the ground swells into a bulb somewhat resembling a Turnip; this again is covered with leaves. The edible part is the bulb, which is dressed and served like turnip, and is very delicate and tender when young. It is very hardy, withstands severe drought, and is a good keeper. Cultivate the same as Cabbage, but in hoeing be careful not to throw dirt into the heart of the plant, or the bulb cannot form.

LEEK.

German, Lauch; French, Poireau; Spanish, Puerro.

	Per oz.	¼ lb.	Per lb.
Large American Flag, the kind mostly grown for market	$0 15	$0 35	$1 25
Large Carentan, a large-growing French variety of excellent quality	15	35	1 25
Large Rouen, very large and fine	15	35	1 25

The Leek is very hardy and easily cultivated; it succeeds best in a light, but well enriched soil. Sow as early in the spring as practicable, in drills one inch deep and one foot apart. When six or eight inches high they may be transplanted in rows ten inches apart each way, as deep as possible; that the neck, being covered, may be blanched. If fine Leeks are desired, the ground can hardly be made too rich.

LETTUCE.

German, Laitick; French, Laitue; Spanish, Lechuga.

Deacon.

	Per oz.	¼ lb.	Per lb.
Thorburn's Maximum; large and solid; heat resisting	$0 20	$0 50	$1 50
Thorburn Market Garden, private stock, solid, large heads	20	50	1 50
Selected Buttercup, yellow, solid heads, for outdoor forcing	20	50	1 50
Big Boston, similar to Boston Market, double this size	15	35	1 25
Grand Rapids Forcing, large tender heads	20	50	1 50
Early Curled Simpson, very early and an excellent sort for forcing; is largely grown by the market gardeners	15	35	1 25
Deacon. This magnificent Lettuce stands hot weather better than any other Butter variety. Large, firm heads of creamy white and rich buttery flavor	15	50	1 50
Denver Market, for forcing or open ground; large solid heads	15	35	1 25
Tennis Ball (black seeded), well formed heads, hardy and crisp one of the earliest of heading varieties	15	35	1 25
Tennis Ball, or Boston (white Seeded), grows very compact, white and crisp; one of the best for forcing or the open ground	15	35	1 25
Salamander Head, fine compact head, resists heat	15	35	1 25
Black-Seed Butter, fine market strain	15	35	1 25
Large White Cabbage, excellent for summer; heads of good size	15	35	1 25
Black-Seeded Simpson, stands the summer well	15	35	1 25
Gray-Seeded Butter, one of the best large heads	15	35	1 25
Shotwell's Brown Head, large and handsome heads; hardy, standing summer heat without injury	20	50	1 50
Trianon Cos, the best of the Cos variety	15	35	1 25
Boston Market, large solid heads, very fine for forcing, and of fine flavor	30	85	3 00
White Cos Romaine. Sow early; tie up to blanch	15	35	1 25
New York Early Cabbage, large solid heads; inside white; very early	15	35	1 25

Lettuce is the most popular of all salads. Boiled, is quite equal to Spinach, and it is also sometimes used in soups. It is easy of cultivation, but likes a good rich soil. For early use, sow Simpson and Tennis Ball under glass in February and March, and transplant as soon as the ground can be worked. Later sowings may be made in the open ground for succession as long as the weather permits; thin out well, or the plants will be weak, and set in rows two feet apart and eight inches between the plants. The best early plants are obtained by sowing in the open ground in September, and transplanting to cold frames the latter part of October, being wintered over in the same manner as early Cabbage. Lettuce requires good ground and abundant moisture.

MARTYNIA.

A strong-growing annual plant, bearing curiously shaped seed pods, which when young and tender make excellent pickles. Sow in the open ground in May, and thin out the plants to two or three feet apart, or a few seeds may be sown in a hotbed and afterwards transplanted. Per oz., 25c.; Qr. lb., 75c.; lb., $2.50.

MELON, MUSK.

German, Melone; French, Melon; Spanish, Melon Muscatel.

	Per oz.	¼ lb.	Per lb.
Paul Rose, handsome, oval, orange flesh, sweet	$0 15	$0 30	$1 00
Livingston's Tip Top. Very sweet	15	30	1 00
Long Island Beauty, similar to Hackensack; very early	20	60	2 00
Winter Pineapple, flesh light green color, flavor of pineapple, does not ripen on the vine	20	50	1 50
(5) **Miller's Cream, or Osage**, flesh a salmon color and very thick	20	50	1 50
Golden Netted Gem, early, small, fine flavor	10	25	80
(3) **Hackensack**, variety of Green Citron, well known among the New York market gardeners, grows to a very large size, productive, exquisite flavor	15	30	1 00
Montreal Market, green flesh, very thick; fine flavor	20	50	1 50

MUSKMELON—Continued.

Baltimore Market, oblong; orange flesh. Per oz., 15 cts.; qr. lb., 30 cts.; per lb., $1.00.

(4) **Delmonico,** oval, deeply netted; orange flesh. Per oz., 15 cts.; qr. lb., 30 cts.; per lb., $1.00.

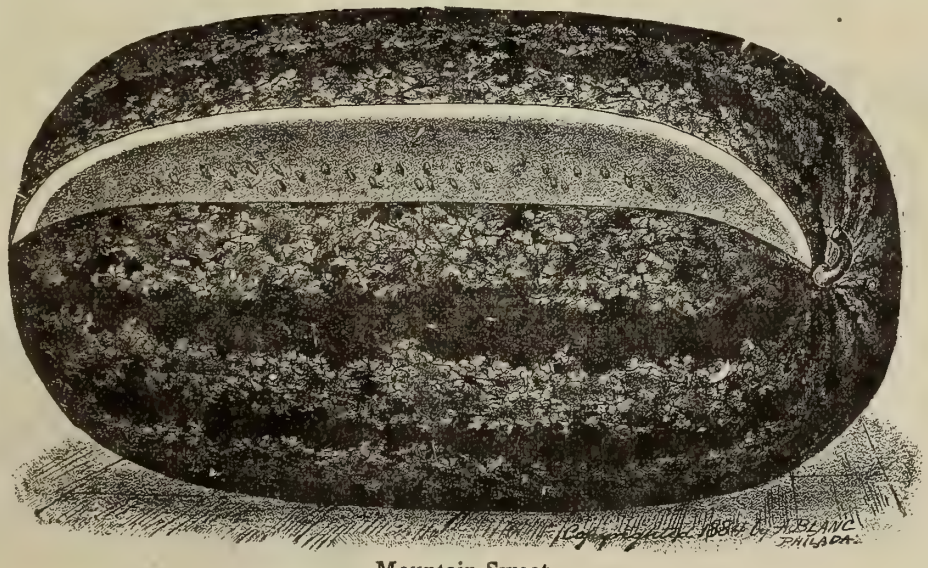
Orange Christina, very clear, excellent sort; green, with yellow flesh. Per oz. 20 cts.; pr. lb., 50 cts.; per lb., $1.50

Bay View, a new green-flesh variety of large size and superior quality. Per oz., 15 cts.; qr. lb., 35 cts.; per lb., $1.25.

Muskmelons.

	Per oz.	¼ lb.	Per lb.
(1) **Jenny Lind,** a very early kind, of small size, but delicious flavor	$0 15	$0 35	$1 25
White Japan, size medium and nearly round; skin cream white and very thin; flesh pale green; early and sweet	10	25	80
(2) **Long Yellow Cantaloupe,** yellow flesh; suitable for the market	15	30	1 00
Pomegranate, for perfume. Not edible	20	50	1 50
Rocky Ford, very sweet; fine flavored, small and oblong	10	25	80

Melons thrive best in a moderately enriched live soil; the hills should be six feet apart each way. Previous to planting incorporate well with the soil in each hill a couple of shovelfuls of thoroughly rotted manure; plant twelve or fifteen seeds in each hill early in May, and when well up, thin out to three or four of the most promising. Pinch off the leading shoots as the growth becomes too luxuriant, and if the fruit sets too numerously, thin out when young, which will increase the size of those remaining, and cause them to ripen quicker.



Mountain Sweet.

MELON, WATER.

German, Wassermelone; French, Melon d' Eau; Spanish, Zaudia.

	Per oz.	¼ lb.	Per lb.
Ruby Gold, flesh yellow and red	$0 10	$0 25	$0 75
Kolb's Gem, nearly round, dark green	10	20	60
Seminole, a new early variety. Long striped sort	10	20	60
Pride of Georgia, dark green oval in shape; crisp and sweet; very large	10	20	60
Scaly Bark, thin rind; flesh light crimson	10	20	60
Mountain Sweet, one of the very best for general culture; color dark green; rind thin; flesh scarlet; solid, very sweet and delicious	10	20	60
Black Spanish, shape round, rather small; skin dark green; flesh red, sweet, rich	10	20	60

MELON, WATER—Continued.

	Per oz.	¼ lb.	Per lb.
Phinney's Early, flesh deep red, of a very superior quality; a valuable early market variety	$0 10	$0 20	$0 60
Cuban Queen, solid and heavy	10	20	60
Ice Cream, (white seeded), fruit of medium size, nearly round; skin pale green; rind thin; flesh scarlet, solid, crisp, excellent	10	20	60
Rattlesnake, very large, striped, red flesh variety	10	20	60
Citron, round, handsome fruit of small size, and used in the making of sweetmeats and preserves	10	25	75
Volga, pale green; red flesh	10	25	75
Mammoth Iron-Clad, long and large; thin skin, deep red flesh	10	20	60
The "Boss," oblong; dark green	10	20	60

Plant in hill as directed for Muskmelons, giving them more room, as their vines extend much farther. If they are wanted of a large size, three or four melons to each plant will be sufficient, and when only one is allowed to grow from each plant they will grow to an immense size.

MUSTARD.

German, Senf; French, Moutarde; Spanish, Mostaga.

	Per oz.	¼ lb.	Per lb.
White London, best for salads	$0 05	$0 10	$0 25
Black, used for cooking and for salads	05	10	25

Mustard in the green state is a refreshing salad, mixed with Cress, Lettuce, or other salad plants. It is necessary to make frequent sowings of it, as it should be cut and used in a very young state, even before the first rough leaf has appeared. The seed should be sown thickly in light soil, the surface of which should be made very smooth. The seed should be pressed into the soil with the back of a clean spade, and should then be watered through the fine rose of a watering pot, without having any soil placed upon it; but the bed should be covered for a few days with a piece of cloth or mat, and in the course of six or eight days the Mustard will be fit for use, and should be cut close to the surface of the soil with a sharp knife; and no soil having been placed over the seeds, it will be found clean and free from grit.

MUSHROOMS.

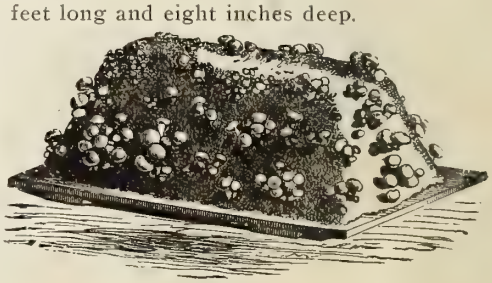
German, Champignonbrut; French, Champignon; Spanish, Hongo.

Imported English Spawn.....15c. per lb.; 10 lbs., $1.25; 100 lbs., $10.00
Imported French Spawn.....30c. lb.; 10 lbs., $2.50

Mushrooms should be grown either in a building especially erected for the purpose or some shed, stable or cellar, where a temperature of from 40 to 60 degrees can be kept up in winter. To every barrow load of fresh horse dropping add about the same weight of loam or soil of any kind that has not been manured. Turn the heap every day, so that it is not allowed to heat violently, until you have quantity enough to form a bed of the dimensions required. Be careful that your heap is under cover, so that it cannot possibly get wet.

The most convenient size for a bed is from three to four feet long and eight inches deep.

Prepare the mixture of loam and manure, making the bed in layers, and pounding down each with the back of a spade. Leave this to heat through for a few days, and as soon as the heat subsides to 90 degrees, make holes in the bed about a foot apart each way, into which put pieces of the spawn, two or three inches in diameter; fill up the holes with the compost, and at the expiration of a week or ten days the spawn will have thoroughly diffused itself through the bed. Now spread a layer of fresh soil over the heap to the depth of two inches, firm it down moderately, and cover with three or four inches of hay or straw. Examine the bed often to see that it does not get dry. When water is given it should be at a temperature of about 100 degrees.



Mushrooms.

NASTURTIUM.

German, Nasturtian; French, Capucine; Spanish, Maranuela.

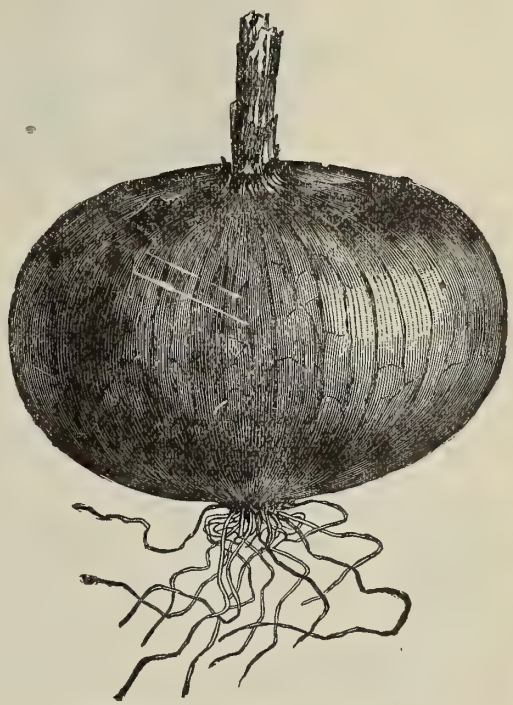
	Per oz.	¼ lb.	Per lb.
Tall Scarlet	$0 15	$0 30	$0 75
Tall Yellow	15	30	75
Tall Nasturtium, Mixed	10	25	65
Dwarf Nasturtium, Mixed	10	25	65

Cultivate both for use and ornament; the green seed pods preserved in vinegar make an excellent pickle. The young leaves are also useful in salads. Its beautiful scarlet and orange-colored flowers, which appear freely all summer, add a charm to the garden.

ONION.

German, Zweibel; French, Wignon; Spanish, Cebolla.

	Per oz.	¼ lb.	Per lb.
Early Red, flat; about ten days earlier than the Large Red, and not quite so large	$0 25	$0 75	$2 25
Large Red Wethersfield, the staple variety of the Eastern onion growers; of large size; deep in color, and a good keeper	25	80	2 75
Yellow Globe Danvers, an excellent variety; mild flavor and very productive; ripens early and a good keeper	20	60	2 00
Prizetaker, large yellow globe-shaped, extra fine	20	60	2 00
White Portugal, or Silver Skin, a handsome onion of mild flavor; extensively grown for pickling	30	1 00	3 50
Griswold's Medium Early Red Globe, about 2 weeks earlier than Southport Red Globe	25	75	2 50
Southport Red Globe, similar to the Large Red in color and flavor, but quite distinct in form, being nearly globular	30	1 00	3 00
Southport White Globe, form nearly ovoid, symmetrical, keeps well, is an excellent variety	40	1 25	4 00
Southport Yellow Globe, same as above, except in color	30	1 00	3 00
White Flat Bermuda, very early	30	1 00	3 00
Red Flat Bermuda, very early	15	50	1 50



Yellow Globe Danvers Onion.

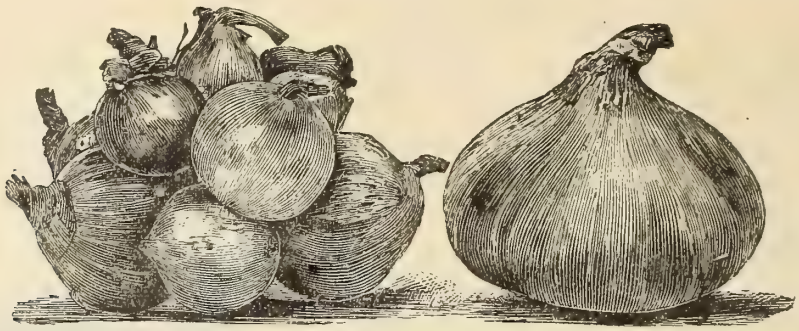
ITALIAN VARIETIES.

	Per oz.	¼ lb.	Per lb.
Adriatic Barletta, white, new variety, fully 2 weeks earlier than the queen	$0 20	$0 65	$2 25
Early Queen, an excellent variety, very early, a good keeper and mild flavor	20	60	2 00
Giant Rocca, a splendid large variety from Naples, of globular shape, bright brown skin and delicate flavor	20	60	1 75

Barletta Onion.

The Onion thrives best in a rather strong, deep, rich, loamy soil, and unlike most vegetables, succeeds well when cultivated on the same ground for successive years. The ground should be deeply trenched and manured the previous autumn, and laid up in ridges during the winter to soften. As early in spring as the ground is in working order, commence operations by leveling the ground with a rake, and tread firmly; sow thinly in drills about a quarter of an inch deep and one foot apart; cover with fine soil and press down with the back of a spade or a light roller. When the young plants are strong enough, thin gradually, so that they stand three or four inches apart. Keep the surface of the ground open and free from weeds by frequent hoeing, taking care not to stir the soil too deeply nor to collect it about the growing bulbs.

ONION SETS.



Potato Onion Sets.

	Per qt.	½ pk.	Per pk.	Per bu.
White Onion Sets	$0 25	$0 75	$1 25	$4 50
Yellow Onion Sets	20	60	1 00	3 50
Red Onion Sets	20	60	1 00	3 50
Potato Onions	25	75	1 25	4 00
Shallots	20	60	1 00	
Red Top Onions	25	75	1 25	

OKRA OR GUMBO.

German, Essbarer Safran; French, Gomo; Spanish, Quibombo.

	Per oz.	¼ lb.	Per lb.
Improved Dwarf White, long slender pods, very productive; only 14 in. high	$0 10	$0 20	$0 40
Dwarf Green, early and productive	10	20	40
Long Green, fine long pods, very good	10	20	40

The pods in a young state are used in soups, sauces and stews, and are very wholesome and nutritious. It is of the easiest culture and grows freely, bearing abundantly when grown in ordinary garden soil. It is sown at the usual time of all tender vegetables in drills two inches deep, setting the plants from two to three feet apart.

Dwarf Green Okra.

PARSLEY.

German, Petersilie; French, Persil; Spanish, Perjil.

	Per oz.	¼ lb.	Per lb.
Extra Double Curled, a fine dwarf variety, excellent for garnishing	$0 10	$0 20	$0 60
Fern Leaved, the most beautiful form of Parsley, resembling crested fern or moss in its growth	10	20	60
Plain, leaves plain, hardier than the curled variety	10	20	50
Moss Curled	10	20	60
Hamburg, or Rooted, edible roots	10	20	60

Should be sown very early in spring in beds or in lines, and the seeds, which are somewhat slow to vegetate, should be previously soaked 24 hours in warm water. The soil should be kept free from weeds, which should be extracted by the hand, so as to avoid disturbance of the seeds when about to germinate. As soon as the plants are large enough they should be thinned out so as to stand five or six inches apart.

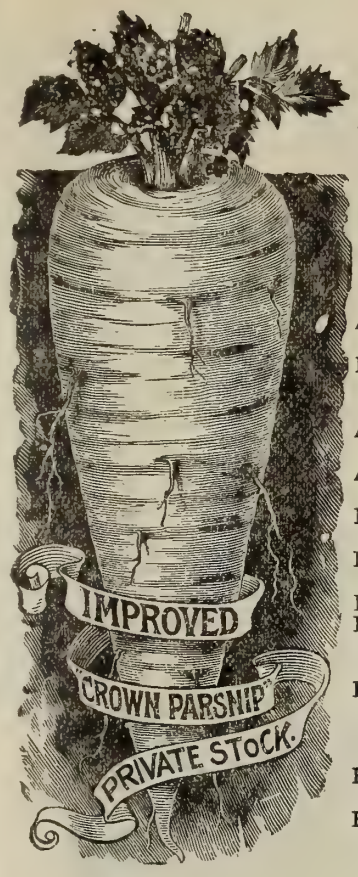
Moss Curled Parsley.

PARSNIPS.

German, Pastinake; French, Panais; Spanish, Chirivia.

	Per oz.	¼ lb.	Per lb.
Guernsey, or Cup, leading variety	$0 10	$0 20	$0 50
Long Smooth or Hollow Crown, long roots	10	20	50
Long White, standard variety	10	20	50

They succeed best in a deep rich soil that has been well manured the previous season, as manure freshly applied tends to the production of forked and ill-shaped roots. Sow the seed early in spring in drills eighteen inches apart in the garden, and three feet apart in the field, and thin the plants to six inches in the drill. (See cut next page.)



PEAS.

German, Erbse; French, Pois; Spanish, Guisántes.

Extra Early Varieties.

	Per qt.	½ pk.	Per pk.	Per bu.
Gradus or Prosperity, Earliest Wrinkled Pea grown. Can be sown early as the round sorts. Large peas, and pods immensely productive and splendid flavor. Requires no sticks, reaching only 36 inches in ordinary good soil. Remember it is hardy, early, prolific, large, easily picked, of prime quality, good appearance and a quick seller. Height 3 ft.	$0 40	$1 25	$2 00	$7 00
Allan's Sunol, very early and productive, height 2½ feet	35	1 00	1 75	6 50
Nott's Excelsior, extra early dwarf wrinkled, pods larger than American Wonder, 1 foot	30	1 00	1 75	6 00
American Wonder, earliest wrinkled variety 1½ feet	30	85	1 50	5 50
Alaska, very early and retain their color well, height 2½ feet	30	1 00	1 75	6 00
Earliest of All, earliest Blue Marrow now offered, height 2½ feet	25	75	1 25	4 50
First and Best, One of the very best extra early Peas. An improved strain of the Extra Early Market, height 2½ feet	25	75	1 25	4 00
Little Gem, a dwarf green wrinkled, Marrow, very prolific, of superior flavor, and a first early; 1½ feet	30	85	1 50	5 50
Premium Gem, A fine flavored dwarf, wrinkled variety; good cropper and fine quality. Height 18 inches	30	85	1 50	5 50

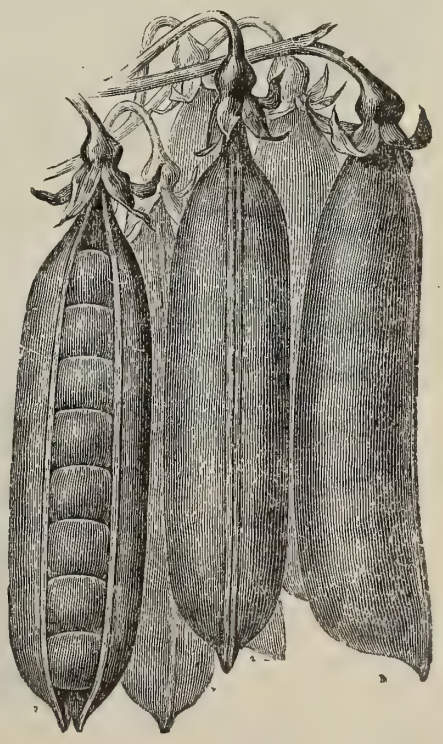
Second Early Varieties.

Heroine Medium Early, green wrinkled, height 2½ feet	30	1 00	1 75	6 00
Everbearing, good size pea, long pod, height 2½ feet	30	85	1 50	5 50

	Per qt.	¼ pk.	Per pk.	Per bu.
McLean's Advancer, early green wrinkled varieties, delicious flavor, 2½ feet	$0 30	$1 00	$1 75	$6 00
Pride of the Market, very large pods, green peas, sow thin, height 2 feet.	30	1 00	1 75	6 50
Yorkshire Hero or Dwarf Champion, 2½ feet	30	85	1 50	5 50
Abundance, 18 inches high, 6 to 8 peas in a pod, large and wrinkled	30	85	1 50	5 00

General Crop.

Champion of England, a popular wrinkled variety of delicious flavor; profuse bearer. Peas are very large, tender, height 5 ft.	30	85	1 50	5 00
Tall Sugar, edible pods, a fine flavored variety, can be used in the green state like string beans, height 5 feet.	35	1 25	2 25	8 00
Dwarf Sugar, edible pods	35	1 25	2 00	7 00
Telephone, This is the best pea for general crop, both for home and market use. Immensely productive and of finest quality. Vines very strong, averaging 18 to 20 large pods per stalk, height 4 ft.	35	1 25	2 00	7 00
Black-Eyed Marrowfat, grown for market, hardy, productive, 3 feet	20	60	1 00	3 00

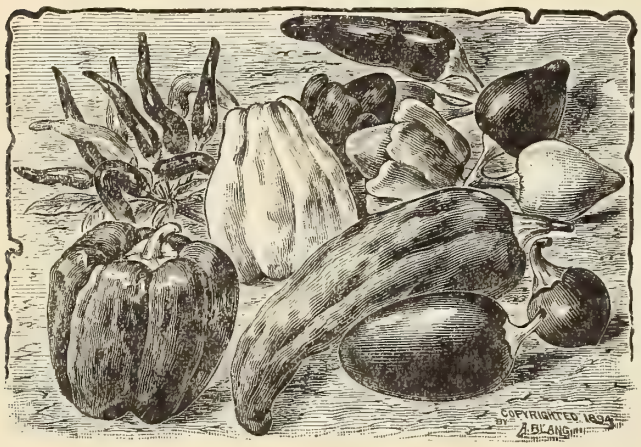


Gradus or Prosperity.

PEAS—Continued.

	Per qt.	½ pk.	Per pk.	Per bu.
White Marrowfat, an old and favorite sort for market, 4 feet	$0 20	$0 60	$1 00	$3 00
Stratagem, mammoth pods, well filled, height 1½ feet	35	1 25	2 00	7 00

Peas come earlier to maturity in light rich soil. For general crop a deep rich loam, or strong loam inclining to clay, is best. For early crops decomposed leaves of leaf mould should be used, or if the soil is very poor, strong manure may be employed. For general crops a good dressing should be applied, and for the dwarf growing kinds the soil can hardly be too rich. When grown as a market crop, peas are not staked, but sown in single rows, two or three inches deep, two to three feet apart, according to the variety. When grown in small quantities, for private use they are generally sown in double rows six or eight inches apart and the rows three feet apart, the tall varieties staked up by bush. For an early crop, sow as soon as the ground can be worked, and make repeated sowings every two weeks for succession. A quart is sufficient for a row of about eighty feet.



PEPPER.

German, Pfeffer; French, Piment; Spanish, Pimiento.

	Per oz.	¼ lb.	Per lb.
Ruby King, very large; bright red	$0 25	$0 75	$2 50
Sweet Spanish, one of the largest, mild and pleasant best for salads	25	75	2 50
Large Bell or Bull Nose, an early variety of mild flavor.	20	65	2 25
Sweet Mountain, or Mammoth, of large size, best for mangoes	25	75	2 50
Chinese Giant, Double the size of Ruby King. This is the largest and finest mild Red Pepper. Flesh is thick and unusually mild. Productive bearer	60	2 00	7 00
Long Red Cayenne, used for Pepper sauces; very pungent	20	65	2 25
Long Yellow Cayenne, similar to long Red, except in color	30	80	3 00
Cardinal, mild, thick fleshed, new	25	75	2 50
Chili, very piquant and prolific; fruit conical; bright scarlet	25	75	2 50
Oxheart, heart shaped, very fine, excellent for pickling	25	75	2 50
Golden Dawn Mango, This is a remarkably prolific Pepper of the Bell class and of a magnificent golden color	20	65	2 25

The Pepper or Capsicum is valuable for its seasoning qualities, as well as for pickling. Sow early in heat and transplant when the weather is warm and settled; or sow in warm situation in the garden about the middle of May. Plants should be set a foot and a half apart.

Houlton, Maine, Potato.

POTATOES—Continued.

Houlton Early Maine, Early and good yielder
Houlton Bliss Triumph, red skin, very early and productive
Houlton Hebron, white skin, the most popular variety in cultivation
Houlton Rose. The Standard variety. Our specialties
Houlton Pearl of Savoy, very early, cross between Clark No. 1 and early Vermont
Houlton Early Queen. Early and productive
Houlton Green Mountain, late variety, good keeper, white and mealy
Prices on application

Houlton Irish Cobbler. A white potato of splendid quality; medium size, but run very evenly. Eyes strong and well developed; flesh white, mealy when cooked and of excellent flavor; very early, ripening before Early Queen. You will not be disappointed in this potato, which cannot be recommended too highly.

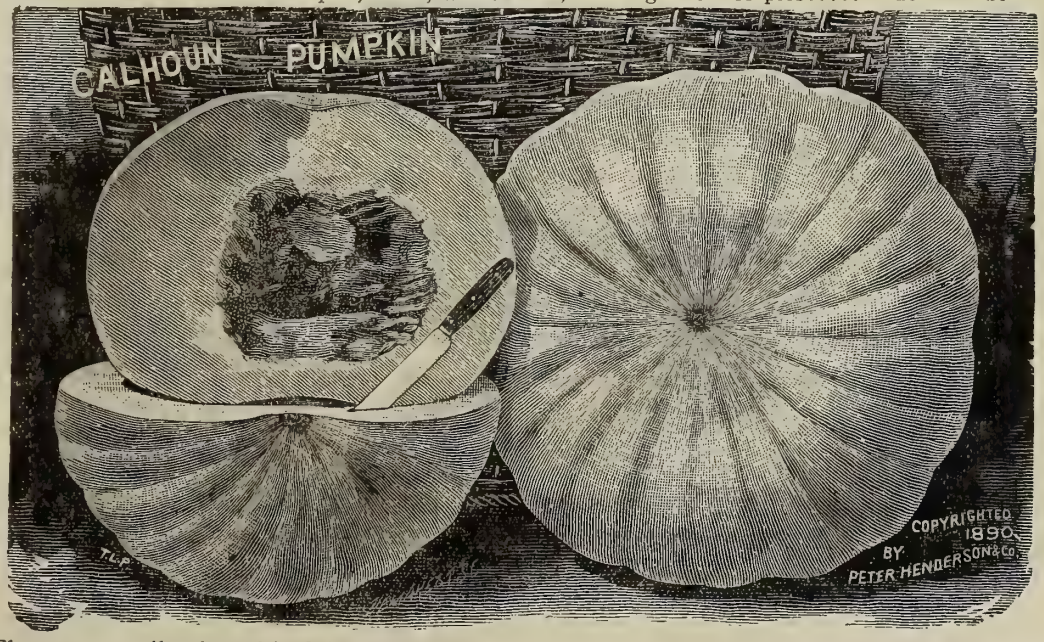
The foregoing varieties are grown for us at Houlton, Aroostock Co., Me., are the choicest stock ever offered. Coming from the extreme northern part of Maine, and raised without the aid of manure, causes them to have very strong eyes and to be hardy and very smooth. Productiveness unsurpassed. The following are raised for us in Washington County, northern New York:

Thorburn, very early, very productive
Rural New Yorker, No. 2
Early Ohio, a seeding of the Early Rose, ripening a week earlier, productive
Prices on application

PUMPKIN.

German, Kuerbis; French, Courge; Spanish, Calabaz a Totanera.

	Per oz.	¼ lb.	Per lb.
Calhoun, flesh wonderfully thick and fine grained, cooks very yellow	$0 10	$0 20	$0 60
Large Cheese, the best variety, hardy and productive	10	20	60
Connecticut Field, very productive, largely grown for feeding stock, 20c. per quart; per bush., $3.00	10	15	30
Mammoth King, grows to an immense size	10	35	1 00
Small Sugar. Fruits medium size, of excellent keeping quality. Flesh very sweet	10	20	50
Cushaw, salmon color, crooked neck	10	25	75
Tennessee Sweet Potato. Bell shaped; thick, white flesh; nothing finer for pies	10	20	60



These are usually planted in fields of Corn or Potatoes, but may be profitably raised in fields by themselves. Sow in May, in hills eight feet apart.

RADISH.

German, Retting; French, Radis; Spanish, Robanitos.

	Per oz.	¼ lb.	Per lb.
Vick's Scarlet Globe, new, very fine	$0 10	$0 20	$0 60
Early Scarlet Turnip, the standard variety; of quick growth, mild and crisp when young	10	20	50
Early Scarlet Turnip, Forcing Variety, maturing in three weeks	10	20	60
Early Scarlet Turnip, White Tipped, a beautiful new early kind, round in shape; color scarlet, tipped with white, a favorite for market gardeners	10	20	50

RADISH—Continued.

	Per oz.	¼ lb.	Per lb.
Early Scarlet Turnip, white tip, forcing	$0 10	$0 20	$0 60
Olive Shape Deep Scarlet	10	20	60
French Breakfast, of quick growth, very mild and tender, of oval form, color scarlet, tipped with white	10	20	60
Long Scarlet, one of the leading market kinds	10	20	50
White Turnip, a summer variety of mild flavor	10	20	50
Yellow Summer Turnip, grows to a large size	10	20	60
Rose China Winter, flesh firm and piquant; excellent for winter use	10	20	60
Black Spanish Winter, long, one of the hardiest and best for Winter use	10	20	60
Black Spanish, Winter, round	10	20	60
Giant Stuttgart, Summer favorite, German sort	10	20	60
California Mammoth White, a giant white fleshed Fall Radish	10	25	75
White Spanish, long, rather milder than Black	10	20	60
White Strasburg, very large, German sort.	10	20	60
White Vienna or Lady Finger, crisp and tender in summer	10	20	60

Scarlet Turnip White Tipped Radish.

There are two classes of Radishes, those for Spring and Summer use, which are small and arrive quickly at maturity, and with proper care can be kept all winter. The summer Radishes should be used while young and tender; if allowed to grow too long they become tough and stringy; they thrive best in a light rich soil. For a successive supply, sow from the middle of March until September, at intervals of two or three weeks. For an early supply, they may be sown on a mild hotbed in February. The winter varieties may be sown from the latter part of July to the middle of September.

RHUBARB.

German, Rabarber; French, Rhuberbe; Spanish, Ruibarbo.

	Per oz.	¼ lb.	Per lb.
Linnaeus, early, large and tender	$0 15	$0 35	$1 00
Victoria, very large, later than Linnaeus	15	35	1 00
Roots	15c., each; $1.50 per dozen		

Sow early in spring, in drills a foot apart, thinning out to about the same distance apart in the rows when a few inches high. In fall or following spring, transplant into deep, rich soil, about three feet apart each way.

SPINACH.

German, Spinat; French, Spinard; Spanish, Espinaca.

	Per oz.	¼ lb.	Per lb.
Long Standing, Round Leaved	$0 10	$0 15	$0 25
Flander's Round Leaved, the variety commonly grown, good for spring or fall sowing	10	15	25
Large Virofray, a new variety, with leaves much larger and thicket than the old variety	10	15	25
Victoria New, dark green color, sow early	10	15	30
Bloomsdale Savoy Leaved, a large, curled, thick leaved variety, the market gardener's favorite	10	15	25
Prickly, prickly seeded, with triangular arrow-shaped leaves	10	15	25
New Zealand, produces leaves in great abundance throughout the summer, should be raised in heat and transplanted three feet apart each way into light, rich soil.	10	30	80

Sow in fall for spring use, in drills a foot apart, thinning out the plants to three inches apart in the rows. Spinach is very hardy and does not require protection except in very exposed places, where a covering of straw or leaves is useful. For summer use sow as early as possible in spring, and at frequent intervals during the season for succession.

SALSIFY, OR OYSTER PLANT.

German, Bocksbart; French, Salsifis; Spanish, Salsifi.

	Per oz.	¼ lb.	Per lb.
Long White French	$0 20	$0 50	$1 50
Mammoth Sandwich Island	20	50	1 50

This very nutritious vegetable requires the same cultivation as Carrots or Parsnips. It is quite hardy and the roots may remain in the ground all winter; a quantity can be taken up and packed in earth or sand, and stored away for use when needed. It makes a fine soup, like the oyster. It is also half-boiled, grated fine, made into small balls, dipped into butter, and fried.

Salsify.

SCORZERONA—Black Oyster Plant.

German, Schwarzwurzel; French, Scourge; Spanish, Escorzonera.

This vegetable requires the same treatment as Salsify, which it nearly resembles .....Per oz., 30c.; Qr. lb., 85c.; Per lb., $3.00

SQUASH.

German, Garten Kuerbiss; French, Courge; Spanish, Calabaza Bonetera.

	Per oz.	¼ lb.	Per lb.
Faxon, medium size, orange flesh, and early	$0 10	$0 25	$0 65
Mammoth Summer Crookneck, twice size of Summer Crookneck	10	25	75
Fordhook Squash, bright yellow, good keeper	15	25	75
The Sibley, solid, thick, brilliant orange in color	15	25	80
Early Golden Bush Scalloped. True bush growth, producing fruit ready for use early in the summer	10	25	65
Early White Bush Scalloped, a white variety of the above	10	25	65
Summer Crookneck, early, productive and of good quality	10	25	65
Canada Winter Crookneck, flesh close grained, sweet and fine flavored	10	25	65
Green Striped Bush, white with green stripes	10	25	75
Boston Marrow, a very valuable medium early variety, an excellent keeper and of superior quality	10	25	65
Hubbard, the best Winter Squash, fine grained, dry, keeps well, and is of excellent flavor	10	25	75
Pineapple, white skin and flesh, fine late sort	10	25	75
Marblehead, a superior winter variety, large, productive, fine grained and sweet	10	25	75
Butman, a superior new winter variety, very dry, fine grained and productive, excellent flavor, keeps well	10	25	75
Turban, flesh orange-yellow, excellent Fall Squash	15	25	75
Mammoth Chili, grows to a large size, often weighing two hundred pounds, excellent for stock	15	35	1 00
Vegetable Marrow. A favorite English sort, skin greenish-yellow, flesh white, soft and rich flavor	10	25	75

Squashes are divided into two classes, Summer and Winter. The Summer varieties come into use about midsummer, and are eaten when the rind and flesh are young and tender. The Winter varieties are left on the vines until they are thoroughly ripe, gathered in the Fall, and stored away for Winter use. If well ripened and kept in a good cellar, they can be preserved until May. Prepare hills for the seeds by incorporating two or three shovelfuls of well rotted manure with the soil, for each hill. For the bush varieties, from three to four feet each way, and for the running sorts from six to eight feet. Eight or ten seeds should be sown to each hill, thinning out after they have attained their rough leaves, leaving three or four of the strongest plants.

TOBACCO.

Connecticut Seed Leaf. This variety is best adapted to the climate of the Northern and Middle States.....Per oz., 25c.; Qr. lb., 75c.; Per lb., $2.50

Havana, imported seed. Vuelto de Abbajo.....Per oz., 45c.; Qr. lb., $1.50; Per lb., $4.50

TOMATO.

	Per oz.	¼ lb.	Per lb.
Earliana, Extra Early. Bright red, smooth. It is claimed to be one of the earliest introduced, very productive	$0 25	$0 75	$2 50
Chalk's Early Jewel. The most valuable extreme early, and "all purpose" bright red Tomato. In most cases early as Earliana, while the fruits are larger, heavier and produced even more abundantly and continuously	30	85	3 00
Truckers' Favorite. The finest, large-fruited purple Tomato. Most regular in form and size, thick meated and very solid; noted for its flavor and shipping qualities. Well worthy a trial	25	75	2 50
Livingston's Honor Bright, solid, long keeping qualities	25	75	2 50
Imperial, very smooth, bright red color, good size	25	75	2 50
New Buckeye State, large size, similar to Livingston's Beauty, little darker in color	25	75	2 50
Thorburn's Terra Cotta, a cross between the Stone, Peach and Ponderosa	25	75	2 50

TOMATO—Continued.

German, Liebesapfel; French, Tomote; Spanish, Tomata.

	Per oz.	¼ lb.	Per lb.
Ponderosa. Very large and solid	$0 30	$0 85	$3 00
New Stone, large and smooth	25	75	2 50
Livingston's Perfection. Very early round; smooth, tough skin brilliant; solid and of rich flavor; ripening thoroughly. A favorite market variety	25	75	2 50
Ignotum, early large and smooth	25	75	2 50
Livingston's Beauty. large dark crimson, thick skin	20	60	2 00
Dwarf Champion, resembles Acme, early	25	75	2 50
Acme, a beautiful variety, fruit of medium size, form perfect and very smooth, ripens all over and through at the same time. This variety seems to possess all the good qualities that can be desired in a Tomato	20	60	2 00
Trophy (selected), the leading variety for general cultivation, and when properly grown will give satisfaction. The seed we offer is carefully selected from pure stock.	25	75	2 50
Golden Queen. A first class large, smooth, pure yellow Tomato. Fine bearer and of excellent flavor.	25	75	2 50
Yellow Plum, used principally for pickling	25	75	2 50
Red Pear Shape, used principally for preserving and pickling	25	75	2 50
Red Currant, for preserves	25	75	2 50
Yellow Cherry, similar to above, except in color	25	75	2 50

The seed should be sown in a hotbed about the first week in March, in drills five inches apart and half an inch deep. When the plants are about two inches high, they should be set out four or five inches apart in another hotbed, or removed into small pots, allowing a single plant to a pot. About the middle of May the plants may be set in the open ground, at a distance of three to four feet apart, in hills in which a good shovelful of rotted manure has been mixed. Water freely at the time of transplanting, and shelter from the sun for a few days until the plants are established. Sufficient plants for a small garden may be started by sowing a few seeds in a shallow box or flower pot, and placing it in a sunny window of the room or kitchen.

TURNIP.

German, Rube; French, Navet; Spanish, Nabo.

	Per oz.	¼ lb.	Per lb.
Milan (purple top), the earliest of all	$0 10	$0 20	$0 50
Purple Top Munich, one of the earliest varieties	10	20	60
Early White Flat Dutch, an early garden variety of medium size	10	20	50
White Top Strap Leaf, quick in growth, of excellent quality	10	20	45
Red Top Strap Leaf. This and the preceding are the best two kinds for Spring sowing and for garden culture	10	20	40
Red Top White Globe, very desirable, extensively grown for market	10	20	50
White Egg, a new variety, beautiful shape, excellent table turnip	10	20	50
Yellow Globe, one of the best for general crop, either for table use or stock	10	20	50
Yellow Stone, a good globe-shaped Turnip, similar to the above	10	20	50
Golden Ball, a table Turnip of quick growth, and unsurpassed quality	10	20	50
Long White or Cow Horn, one of the best field Turnips, flesh fine grained	10	20	50
Yellow Aberdeen, hardy and productive, largely grown for farm purposes	10	20	45
Large White Norfolk, globe-shaped variety, one of the best for stock	10	20	40
Pomeranian White Globe, very fine, white Globe variety, round and thick	10	20	40
German Tetlow, small, early, fine grade, sugary	10	25	70

RUTA BAGAS.

American Improved Purple Top, the leading variety, of fine quality, valuable both for the table and for feeding stock	10	20	50

RUTA BAGAS—Continued.

	Per oz.	¼ lb.	Per lb.
Carter's Imperial Hardy Swede, an English variety, highly recommended as producing enormous crops	$0 10	$0 20	$0 60
Long White French, an excellent sort either for table or stock	10	20	50
White or Sweet German, a large, solid variety	10	20	45
Shamrock, very large and solid, one of our choicest varities	10	20	50
Laing's Improved, globe-shaped, with a small top and tap root	10	20	50
Skirving's, an improved purple topped variety of large size	10	20	50

For Spring crop, commence sowing early varieties as soon as the ground can be worked, in drills fourteen inches apart; thin out the plants to five or six inches apart. Keep clear from weeds, and when the bottoms begin to enlarge, brush away the earth from about the roots to the depth of an inch or more, and give them a light dressing of wood ashes. This is the surest mode of obtaining fair and smooth Spring Turnips in old gardens, where they are almost certain to grow wormy if the earth is allowed to remain in contact with the roots. It is important to get them started very early so that they may have time to grow to a sufficient size before very hot weather, when they will soon become tough and strong. For the Fall and main crop, sow from the middle of July to the last of August in drills as directed for the Spring sowing. In the field, Turnips are more generally sown broadcast though much larger crops are obtained by drill culture.

SWEET POT AND MEDICINAL HERB SEEDS.

Herbs are valuable for culinary and medical purposes, but they do not always receive the attention which they deserve. They are easily grown, and when preserved by drying are ready for use at any season of the year. Sow in Spring as soon as the weather is warm, and thin out as the plants grow up, or the seeds may be sown under glass and the young plants afterwards transplanted to their respective beds. The perennial kinds should occasionally be divided and transplanted in Spring.

	Per oz.
Anise (Pimpinella anisum,) an annual, cultivated for its seed and its leaves, which are used for garnishing and for seasoning	$0 10
Balm (Melissa officinalis,) a hardy perennial, used for making balm tea and balm wine	25
Basil, Sweet (Ocymum basilicum.) This is a tender annual, cultivated for its leaves, which are much used for flavoring soups and sauces	15
Bene (Sesamum orientale)	10
Borage (Borage officinalis,) hardy annual, sometimes used as a pot herb, and also for garnishing, but chiefly required for claret cup and other cooling drinks. Bees are very partial to the flowers	10
Caraway (Carum cauri,) hardy biennial, cultivated for its seeds, which are largely used in various kinds of confectionery and for giving flavors to liquors	10
Catnip (Nepeta cataria,) perennial	40
Coriander (Coriandrum salivum,) an annual; raised for its seeds, which are used by confectioners, and sometimes to disguise the taste of medicine	10
Dill (Anethum graveolens.) annual, the leaves are u ed in soups and sauces, and the seeds are sometimes added to pickle cucumbers to heighten the flavor. Medicinally they are good for flatulence and colic in infants	10
Fennel (Antehum foeniculum,) hardy perennial, leaves used for garnishing, and in the preparation of various fish sauces	10
Horehound (Marribium vulgare,) hardy perennial, principally used for medicinal purposes	25
Hyssop (Hyssopus officinalis,) hardy perennial; the leafy tops and flowers are used for making hyssop tea	25
Lavender (Lavandula spica,) a popular aromatic herb	35
Marjorum, Sweet (Origanum Marjorana,) for seasoning	10
Opium Poppy (Papaver somniferum,)	20
Rosemary (Rosmarinus officinalis,) an aromatic herb	40
Rue (Ruta graveolens,) used for medicinal purposes, also frequently given to fowls for the roup	20
Saffron (Carthamus tinctorius)	10
Sage (Salvia officinalis,) much used for flavoring various articles of cookery. It is also possessed of medicinal virtues. Tea made from its leaves is a soporific; causing profuse perspiration	15
Summer Savory (Satureia hortensis,) annual. It has medicinal and culinary uses. Its aromatic leaves are much esteemed in salads and soups	10
Sorrel, Broad Leaved, used in salads	15
Thyme, Broad Leaved English, hardy perennial. Thyme is used in various ways for soups, sauce and dressings, and a tea is made of the leaves which is a great remedy for nervous headache	25
Tarragon, Roots, each	25
Tansy (Tanacetum vulgaris)	65
Wormwood (Artemesia abietnium,) used for medicinal purposes; it is also beneficial to poultry and should be planted in poultry grounds	20

GRASS SEED.

These Prices are Subject to Variation.

Blue Grass Kentucky, (Poa pratensis,) extra clean; does well on light dry soils; recommended for permanent pasture; it requires two or three years to form a good sod, and does not arrive at its perfection as a pasture grass until it is much older; valuable in mixtures for lawn.....Per lb. $0 25
Per bushel of 14 lbs. 2 50

Creeping Bent Grass, Florin, (Agrostis stolonifera,) used by many for lawns, also well adapted to most places .....Per lb., 30c.; per bushel of 15 lbs., 4 00

Crested Dogtail, (Cynosurus cristatus,) good for permanent pasture for sheep, is productive and early, suffers but little from dry weather, and is one of the best grasses for lawns. 25 lbs. to the acre .....Per lb., 45

Hard Fescue, (Festuca duriuscula,) admirable pasture grass of fine quality, thrives well in dry situations. 30 lbs. to the acre; 12 lbs. to the bushel. (By bushel, 15c.).....Per lb. 20

Meadow Fescue, (Festuca pratensis,) this is excellent for hay when sown with other grasses, such as Orchard Grass and Timothy, and is also considered one of the best grasses for permanent pasture on a great variety of soils. 40 lbs. to the acre. (By bushel, 15c.).....Lb. 20

Sheep's Fescue, (Festuca ovina,) does well in high, dry and open pastures, is of short, dense growth, and valuable in lawn mixtures. 30 lbs. to the acre. (By bushel, 15c.).....Per lb. 20

Meadow Foxtail, (Alopecurus pratensis,) regarded as one of the most desirable grasses for permanent pasture, being early and rapid in growth. 25 lbs. to the acre. (By bushel, 30c.).....Per lb. 50

Meadow Soft Grass, (Holcus lanatus,) will grow with little or no care in any soil; it is chiefly cultivated where the better grass will not grow. 3 bushels to the acre; 7 lbs. to bushel. Per bushel, $1.40 .....Per lb. 25

Orchard Grass, (Dactylis glomerata,) is one of the most desirable of all pasture grasses, coming early in the Spring and remaining later in Autumn than any other, 3 bushels to the acre; (Box lots 225 lbs.).....Per bushel. 2 75

Red Top Grass, (Agrostis vulgaris,) good permanent grass, excellent for lawns, pastures, etc., and sowing with Timothy and Red Clover for cutting for hay. Sack 50 lbs., $3.00; Per bushel of 14 lbs 1 00

Fancy Red Top Grass, cleaned like Timothy; free from chaff. Bushel 15c. lb.....Per lb. 20

Rhode Island Bent Grass, (Agrotsis canina,) best of all grasses for lawn where only one variety is used. 30c. lb.....Per bushel of 12 lbs. 3 00

Rye Grass English, (Lolium perenne) Probably one of the most important and valuable of the cultivated grasses; is naturally adapted to almost any soil; matures early, and is very productive, but contains less nutrition than Orchard Grass, lb., 15c. Bushel of 24 lbs..... 2 00

Rye Grass Italian, (Lolium Italicum.) This ripens much sooner than the English Rye Grass, and is greatly preferred by cattle, and greedily eaten by them, either in a green or dry state. Per lb., 15c.; per bushel of 18 lbs..... 1 50

Sweet Vernal Grass, (Anthoxanthum ordoratum,) is not valuable when sown alone, but when sown with other grasses it becomes so because of its early growth. It also yields a delightful odor when cured for hay. 10 lbs. to the acre, mixed with other grass annuals. .....Lb. 20

Tall Meadow Oat Grass, (Avena elatior,) very valuable for pasture on account of its early and luxuriant growth. It shoots up very quickly after being cut, and produces a thick crop of aftermath, which also makes it valuable as a soiling crop. It has been lately in demand and is much valued in the South.....30c. lb. Per bushel of 13 lbs. 3 00

Timothy, Herd's Grass, (Phleum pratense,) As a crop to cut for hay, this is probably unsurpassed. It thrives best on moist, peaty or loamy soils, and is not suited to light or sandy soils, although on such it can, with care, be made to produce fair crops. Price according to market. 45 lbs. to bushel. 12c. lb.....Bushel 3 25

Rough Stalked Meadow Grass, (Poa trivialis,) produces a constant supply of highly nutritious herbage, particularly on dry soils; one of the most valuable for laying down pastures and meadows on soils either moist or moderately dry. 14 lbs. to the bushel; 20 lbs. to the acre. Per lb., 50c. Per bush. 5 00

Wood Meadow Grass, (Poa nemoralis). This grass grows well both on shady and exposed situations. 30 lbs. to the acre.....Per lb. 65

Yellow Oat Grass, (Avena flavescens,) good for dry pastures and meadows. Is much relished by sheep .....85c. lb. Per bushel of 8 lbs. 6 50

Golden or German Millet. This variety is a heavier cropper than the Hungarian Grass, and needs a longer season and stiffer soil. Grows from three to five feet high, stands up well, is easily cured, gives general satisfaction. Three pecks to the acre. Per bushel of 48 lbs. Market Price.

Hungarian Grass, a valuable forage plant, succeeds well on dry, light soil; withstands the drought remarkably, remaining green when all other vegetation is parched up, and if its development is arrested by dry weather, the least rain will restore it to vigor. Sow broadcast. Three pecks to the acre. Per bushel of 48 lbs., Market Price.

MUZZY BROTHERS' CELEBRATED LAWN GRASS

Muzzy Bros.' Fine Mixed Lawn Grass, Composed of a mixture of the finest grasses; sow four to five bushels per acre. 15c. qt.....Per bushel $3 00

Muzzy Bros.' Special Lawn Mixture. This extra choice mixture contains a large proportion of the finer and more expensive species of grasses, in extra heavy samples, producing a turf of the closest and finest texture possible. 25c. qt.....Per bushel 4 50

Muzzy Bros.' Shady Lawn Mixture. A mixture of grasses that thrive in shady situations, under trees, or close to walls where there is little sun. 25c. qt.....Per bushel 5 00

QUANTITIES TO BE USED.

						Extra Mixture.	Shady Lawn

For large lawns, where turf has become bare through constant use, it is only necessary to sow fresh seed at the rate of one to two bushels to an acre. On such lawns it is well to use our Lawn Dressing, which can be raked in.

How to Make a Lawn

The ground ought to be carefully prepared during the winter, by draining if found requisite, and digging to the depth of six to twelve inches, according to the nature of the soil. The land should then be leveled and raked to remove stones, etc., and then made firm with a heavy iron roller. When the natural soil is too stony, a supply of good mould, should be spread over it to the depth of two or three inches. In March or April, before sowing the seed, the ground ought to be thoroughly cleaned and made perfectly level with the iron roller and as the subsequent appearance of the lawn depends in a great measure on this part of the preparation, it is of the utmost importance it should be well done. The

ground should then be evenly raked and the seeds sown. April and September are the best months for sowing. The seed should be sown on a calm day, at the rate of four bushels to the acre.

After the sowing has been accomplished, the ground should be again rolled, and as soon as the young plants have attained the height of two or three inches, the whole plot should be carefully gone over with a sharp scythe, and from the months of April to October it should be mown every ten days. Mowing machines are excellent after a comparatively close turf is established; but for the first six months' sowing, the scythe should be used in preference to the machine. **Frequent mowing and rolling are indispensable to maintain the turf in good order.** By adopting these means a close green sward will be obtained in a short time.

For lawns requiring improvement, and on croquet grounds, where the turf has become bare through constant use, it is only necessary to sow fresh seed at the rate of one or two bushels to the acre, either in the Spring or Fall, using a small tooth rake, and rolling afterwards. A slight dressing of manure, late in Fall, will often be found beneficial in encouraging the growth of finer kinds of grasses, and helps to produce a close growing turf.

MEADOW AND PASTURE MIXTURES

The formation of permanent and productive meadows and pastures is of great value to farmers, and has been given thorough study by numerous experts, resulting in formulas that will give good results under the varying conditions of our climate.

It is a well known fact that a heavier and more prolonged growth is produced by a mixture of many sorts of grasses than by only one or two. Some sorts do best on high dry soil, while others prefer plenty of moisture. Some mature so early and others so late there is no time in the season when one sort or another is not at its best. Grass seed may be sown either early in spring or in fall, from Sept. to the middle of October in this latitude. Below we give mixtures that we are confident will give good results.

MEADOW MIXTURE FOR ONE ACRE.

No. 1. On Good Land, neither Too Dry or Too Wet.
Price $3.00 per Bushel of 20 lbs. Sow 2 bushels to the acre.

No. 2. For High and Dry Land.
Price $3.50 per Bushel of 20 lbs. Sow 2 bushels to the acre.

No. 3. On Wet Land.
Price $3.00 per Bushel of 20 lbs. Sow 2 bushels to the acre.

PASTURE MIXTURE FOR ONE ACRE.

No. 4. On Good Land, neither Too Wet or Too Dry.
Price $3.50 per Bushel of 20 lbs. Sow 2 bushels to the acre.

No. 5. On Dry Land.
Price $4.00 per Bushel of 20 lbs. Sow 2 bushels to the acre.

No. 6. On Wet Land.
Price $3.50 per Bushel of 20 lbs. Sow 2 bushels to the acre.

CLOVERS.
(Subject to variation in Price.)

	Per lb.	Lots 25 lbs.. Per lb.
Red Clover, Medium (Trifolium pratense). Price variable, 60 lbs. to bushel.		
Red Clover, Large or Pea Vine. Price variable.		
White Clover, (Taifalium repens)	$0 30	$0 24
Alfalfa or Lucerne, requires a deep, rich soil, and in such will produce several crops every season. Fifteen pounds to the acre	25	20
Alsike or Swedish (Trifolium hybridum). Ten pounds to the acre	25	20
Crimson or Italian (Trifolium incarnatum), sown in Autumn, it furnishes an early fodder, and is excellent for soiling. Twenty pounds to the acre. Price variable	20	11
Bokhara Clover (Melilotus alba), affords excellent feed for bees, it is a valuable soiling plant; lasts two years. Ten pounds to the acre	30	24
Yellow Trefoil (Medicago lupulina) Hop clover. Fifteen pounds to the acre	20	12

GRAINS

All grains are selected expressly for seed, and are strictly pure and true to name.

SPRING WHEAT, 60 LBS. BUSHEL.

Mashatchewan Fife
China Spring, chaff bearded variety, and a general favorite
Mediterranean Spring. This variety has been grown with great success for a number of years in some sections of New England, and is very highly recommended, is bearded, yields well and the kernels are larger than those of other Spring varieties
White Russian. This variety, recently introduced, has proved very valuable in many localities in the Northwestern States. Straw of good length, strong, does not lodge. It is not inclined to rust. Heads of large size and well filled with plump wernels weighing 6 to 62 lbs. to the bushel. Has produced 40 to 50 bushels to the acre.

Market Price.

GRAINS—Continued.

WINTER WHEAT, 60 lb. Bushel.

Jones' Winter Five, surpassing all other varieties in hardiness and productiveness.....
Golden Cross, has the yield of the Clawson, with flour of the Mediterranean.....
Clawson also known as the Seneca. This is a beardless white wheat with red chaff. It proves early and hardy, has a stiff straw yields larger crops than any other.....
Fultz. A beardless amber variety, grown largely in some sections of Pennsylvania and with very satisfactory results. It is very hardy and productive, and the straw is of medium length and very strong; makes excellent flour.....
Red Mediterranean (American). This is the imported variety fully acclimated and is a standard wheat. The heads are bearded and well filled. It succeeds well in nearly all localities and ripens early.....

Market Price.

OATS, 32 lb. Bushel.

Swedish, heavy and bright color.....
Washington, very popular, and standing well until fully ripe.....
Probsteirer, very productive and heavy. The straw is very strong; No. 32.....
Scotch, one of the leading varieties.....
Welcome .....

Prices on application

RYE, 56 LB. BUSHEL.

Spring Rye.....Price on application
Winter Rye.....Price on application

SPRING BARLEY, 48 LB. BUSHEL.

Vermont Champion (two rowed).....Market Price

BUCKWHEAT, 48 lb. Bushel.

Silver Hull variety is a great improvement on the common Buckwheat. Sown at the same time it will continue to bloom longer, matures a few days sooner, and yields nearly or quite double under the same conditions. Market price.

JAPANESE BUCKWHEAT.

Yields twice or three times as much as Silver Hull and ripens a week earlier.....Market Price.

Cultivation of Flower Seeds

HARDY ANNUALS.

Successive sowing may be made from March to the end of September; March, April and May are the best months for general Summer display; June and July for Autumn blooming, and August and September for Spring flowering. The soil should be carefully prepared by being finely pulverized and made light and rich.

Sow thinly; cover with a very thin coat of fine, dry earth—the smallest seeds needing but a mere dusting to cover them—and from the first keep the plants thinned sufficiently to prevent overcrowding, which weakens them and produces poor blooms.

HALF HARDY AND TENDER ANNUALS.

These include some of the most beautiful and varied of our Summer flowers, among which may be mentioned Aster, Balsam, Ten-Weeks' Stocks, Phlox, Drummondii and Double Zinnia, which in form, size and brilliancy of flowers, and their great diversity of color, are now brought to a high state of perfection.

Sow from the beginning of March to June; when sown in March and early part of April, sow thinly in well-drained pots, pans or boxes; place in the greenhouse or a frame where there is a mild heat, or in the absence of these, a sunny window in the house will do; cover the seeds lightly, press down the soil firmly and give a gentle watering with a fine rose water pot.

Separate the plants when large enough to handle, and finally plant out in May, as soon as the weather is sufficiently warm where intended to flower. The seed can be sown in the open ground in May and June.

Salvia Splendens.

Double Zinnia.

HARDY BIENNIALS AND PERENNIALS.

These can be grown at all seasons of the year in the open garden without protection, and may therefore be placed among the most useful of our flowering plants; their variety is almost endless, producing almost every form of flower and shade of color.

The seed may be sown from May to October, but the best time is in May and June. Select for sowing a shady, moist situation, and, in order to secure fine, strong plants, sow thinly, and as soon as large enough transplant in showery weather to nursery beds, and finally plant out in October and November; those sown in Autumn are best planted out in March or April, where intended to flower. Many Perennials, if sown early and treated as Annuals will flower the first season. The Pansy, Petunia, China Pink and its several splendid varieties, and many others, do better as Annuals than Perennials.

Half Hardy Biennials and Perennials may be raised and treated in the same way as recommended for Half Hardy Annuals.

ANNUALS FOR WINTER BLOOMING.

Many Annuals are very desirable for the greenhouse for Winter blooming; these should be sown in July or August. The most important are Browallia, Candytuft, German Stocks, Lobelia Mignonette, Schizanthus, Sweet Alyssum and Dwarf Nasturtiums. Many varieties as well as the above may be sown in the Fall and Winter for blooming early in the Spring, such as Acroclinium, Ageratum, Antirrhinum, Apple-scented Geranium, China Pinks, Dianthus, Mimulus, Myosotis, Pansy, Petunias, Phlox Drummondii, Salpiglossis, Salvia, Verbena, Vinca and others.

General List of Flower Seeds

Abbreviations and Signs used in the following list

A. Annual, refers to those plants that last but one season, and must be raised annually.
B. Biennial, raised one year, bloom and die the next.
P. Perennial, lasts two or more seasons.
h. Hardy, as those that may be grown at all seasons in open air, without protection.
hh. Half hardy, require the protection of a frame pit, or handlight till May, when they may be transferred to the open garden.
t. Tender, require to be raised and grown under glass, and will only do in the open air in July, August and September.
cl. Climbing, as Cypress Vine, Morning Glory, etc.
spr. Spreading or trailing as Verbena.
g. Greenhouse, those plants which require to be grown under glass.
s. Shrubs, plants of a shrubby or bushy habit.

Those Biennials, and Perennials marked with an asterisk (*) will bloom the first year if sown early.

AMMONIATED FLOWER FOOD

A Dressing made expressly for plants grown in the house, garden, or conservatory. Clean, odorless, and producing early and abundant blossoms of rich and brilliant color, and healthy, luxuriant plants, free from vermin.

This Ammoniated food was the *first* odorless chemical preparation made and sold in this country. It is made expressly for flowers grown in the house, garden, or conservatory, and contains the same plant food as stable dressing, but in a cleaner and more soluble form.

Price 15 cents per Package.

ROSEBUSHES, BULBS, ETC.

Hardy Roses. Two year old, Holland grown, our own importation. We carry the largest assortment of **Rosebushes** in the state. Both hardy and everblooming we append a partial list of the varieties we carry in stock for immediate delivery—they will produce a full crop of blooms the first summer.

Caladium.

American Beauty. Rich, rosycrimson. Very large.
White American Beauty. Very large, pure snow white.
Baroness Rothschild. Bright, rosy pink, Immense signs.
Crimson Rambler. Immense cluster bright red flower—very quick grower and hardy.
White Rambler. Same as Crimson, cut with pure white blooms, hardy.
Yellow Rambler. Yellow blooms in big clusters, hardy.
Genl. Jack. Large brilliant, bloodred blooms. Fine bloomer.
Giant of Battles. Rich shade of rosy-crimson.
Glorie de Dijon. Free blooming climber. Tea scented flowers of creamy white tinged with salmon and pink.
La France Pink. One of the sweetest and most beautiful roses grown. Large, silvery pink. Blooms till frost.
La France Red. Large blooms of brilliant rose pink almost crimson.
La France White. Same as above two, but blooms are pure white. Very free bloomer.
Kaiserine Aug. Victoria. One of the best blooming, largest and sweetest white roses grown.
Marechal Neil. Large, clear yellow. Ever bloomer.
Magna Charta. Rosy crimson. Large buds and blooms.
Mrs. John Laing. Clear shining pink, beautifully shaded.
Merville de Lyon. Ivory white flushed with carmine.
Mons. Boncenne. Dark, velvety crimson. Very large.
Perle de Lyon. Deep golden. Ever bloomer.
Paul Neyron. Dark rose, very large and fragrant.

15c. each, 2 for 25c.

BULBS.

Tuberoses. One of the most delightfully fragrant and beautiful of the summer flowering bulbs. By skillful management a succession of flowers may be obtained all the year round. For early flowers they can be started in February or March in the greenhouse or hotbed; and for a succession they can be planted at intervals as late as July. For flowering in the open border plant about the middle of May or as soon as the ground becomes warm. No. 1, Pearl Dbl. 3c.; 2 for 5 cents.

Dahlias.

Our Dahlia roots are exceptionally fine this year, being Southern grown, and true to name and color. We carry a large assortment of colors. 10c. each.

Caladium Esculentum. Elephant's ears.

One of the most effective and easily grown plants for the lawn or flower border. Will thrive in any ordinary garden soil, but to get best results plant in rich soil and give plenty of water. With such treatment a select size bulb will make a plant about 5 feet high with leaves 3 feet long and 20 inches wide. 7 to 9 inches 5c.; 9 to 11 inches 10c.; extra large 15c.

Gladiolus

Extra Fine Mixed. With a view to supplying a high grade mixture at moderate prices we have had grown for us by Gladiolus specialists good quantities of some of the choicest named kinds for this mixture, and shall use with them some of Child's hybrids and other best mixtures which will insure a large variety of shades and colors. This is truly a banner strain. Price 3c each; 30c dozen.

Paeonies. No other plant flowering at the same season can vie with the Paeony for beauty. They are perfectly hardy, requiring no protection whatever, are not troubled with insects or diseases, and once planted take care of themselves. Price 20 cents each.

Cannas. Extra strong roots, 5c. each.

A General Fertilizer Suitable For Every Crop

Stands ahead of anything in the market in Analys's, selling Price and Results. The Great Satisfaction this Fertilizer has given our Customers, beng so universal, enables us to recommend it as the Leading Artificial Manure in the Market.

Muzzy Bros.' "Sure" Phosphate

FOR GENERAL CROPS. BEST FERTILIZER EVER MANUFACTURED.

GUARANTEED ANALYSIS.

Nitrogen	2.46 to 3.28 per cent.	Total Phos. Acid	10 to 11 per cent.
Equal to Ammonia	3 to 4 per cent.	Potash Actual	6 to 8 per cent.
Available Phos. Acid	8 to 10 per cent.	Equal to Sulph. Potash	11.09 to 12.94 per cent.
Insoluble Phos. Acid	1 to 2 per cent.	Per ton (10 bags), $33.00; per bag (200 lbs.), $3.50.	

Muzzy Bros.' "Sure" Super-Phosphate

FOR POTATOES.

Nearly every farmer grows Potatoes, and consequently is, with the trucker and market gardener, interested in buying that fertilizer which, for the least cash outlay, will bring him the best returns; as it is no longer a question, but an actual fact, that with a Potato Manure made from first-class material, like our **"SWIFT-SURE" SUPER-PHOSPHATE FOR POTATOES**, you can grow a larger crop of Potatoes than you can with barnyard manure, and have them smoother, free from imperfections and of more uniform size.

GUARANTEED ANALYSIS.

Nitrogen	2.46 to 3.28 per cent.	Total Phos. Acid	9 to 11 per cent.
Equal to Ammonia	3 to 4 per cent.	Potash Actual	7 to 8 per cent.
Available Phos. Acid	8 to 10 per cent.	Equal to Sulph. Potash	12.94 to 14.79 per cent.
Insoluble Phos. Acid	1 to 2 per cent.	Per ton (10 bags), $33.00; per bag (200 lbs.), $3.50.	

Muzzy Bros.' Special Fertilizer

AN EXCELLENT FERTILIZER FOR GENERAL CROPS.

Nitrogen	1.65 to 2.47 per cent.	Insoluble Phos. Acid	1 to 2 per cent.
Equal to Ammonia	2 to 3 per cent.	Potash Actual	4 to 5 per cent.
Available Phos. Acid	8 to 10 per cent.	Equal to Sulph. Potash	7.40 to 9.25 per cent.
Total Phos. Acid	9 to 11 per cent.	Per ton (10 bags) $30.00; per bag (200 lbs.) $3.25.	

Fine Ground Bone For Lawns

AN EFFICIENT AND PERMANENT DRESSING FOR LAWNS; ODORLESS.

Guaranteed Analysis.

4 to 5 per cent. Ammonia. 45 per cent. Bone Phosphate of Lime.

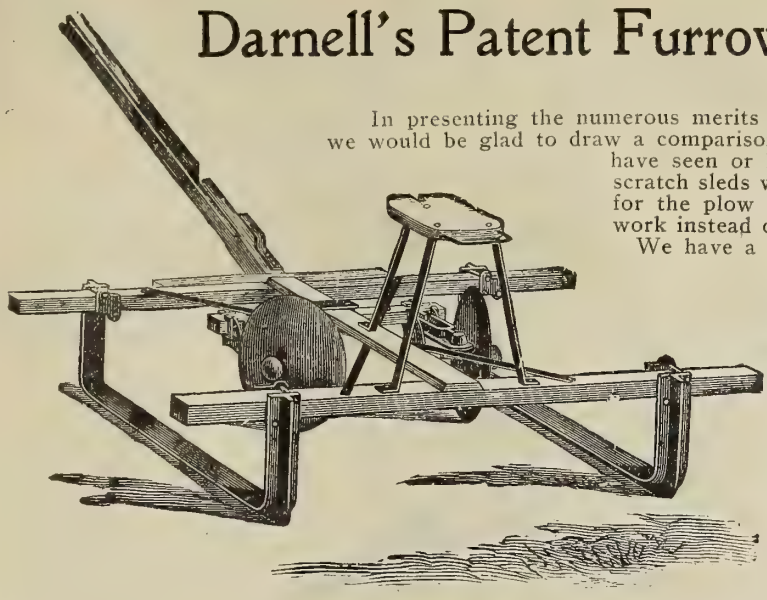
No. 21.—Swivel, One-horse, Cast Moldboard, Wood Beam $7 98
Weeder—7½ feet wide, 35 adjustable spring steel teeth $7 98

REPAIRS FOR ABOVE PLOWS ALWAYS IN STOCK.

Darnell's Patent Furrower and Marker



In presenting the numerous merits of this invaluable little implement we would be glad to draw a comparison with another of its kind, but we have seen or heard of nothing but the ordinary scratch sleds which make a mere mark as a guide for the plow which follows, thus increasing the work instead of lessening it.

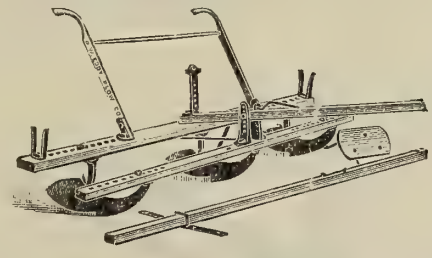
We have a genial ever-borrowing neighbor, however, with whom we might compare notes, and we will just bring him forward with his plow which he is inclined to think is good enough yet. We think you will not fail to notice the difference.

We ride while he walks.

We bring into requisition the services of our boy, if busy ourselves, while nothing short of a man, and a good one, too, can handle the plow.

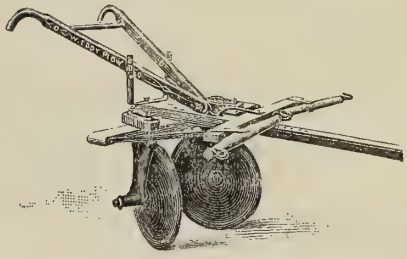
We open two furrows while he opens one in clean ground, and do it better.

THE EDDY IMPROVED MARKER.



These Markers have chilled Shoes or Runners with steel wings bolted on, and may be easily replaced when worn. Frames made of seasoned oak, firmly braced and bolted together, arranged with holes permitting the adjustment of the shoes to any width desired. Gauge is adjustable and swings to either side. It will save time enough to pay for it in one season, also improve the looks of your fields. Price **$11.00.**

EDDY'S No. 10 DISC HOE AND COVERER.



The Eddy Disc Hoe and Coverer have 20 inch steel Discs. Adjustable handles and are invaluable for covering and ridging all kinds of row crops. Adjustable in every way it is one of the best implements on the market.

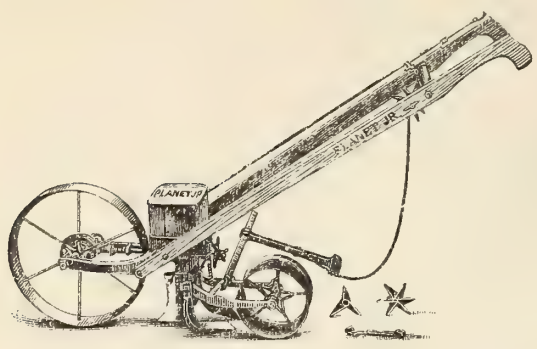
Price **$10.00**

Steel Hoe and Cultivator.

This is our new Steel Hoe and Cultivator, which we are putting on the market for the first time this year.

It has an expanded lever with an adjustable wheel. Will find it a first class tool at a low price.

Price Complete, $5.98.



The "Planet Jr." Garden Seed Drills

"Planet Jr." No. 3

MARKET GARDENER'S HILL AND SEEDER DRILL.

Price $11 00

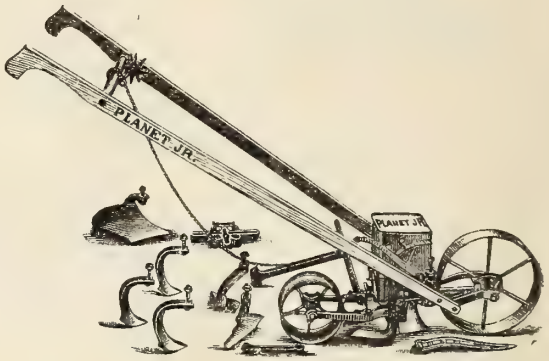
The Favorite among market gardeners, onion growers and seedmen. Hill dropping at 4, 6, 8, 12 and 14 inches apart. Can be changed instantly to drill. The regulation in amount to handle seed is absolutely correct, and very simple to handle. Handles are adjustable in height, for man or boy.

"Planet Jr." No. 4

HILL DROPPING SEED DRILL, HOE, CULTIVATOR AND PLOW.

PRICE COMPLETE.....**$11 00**
PRICE AS A DRILL ONLY.....**$9 00**

We are pleased to offer for 1908 a new combined tool of great excellence, which we can scarcely recommend too highly. It combines conveniently in a single garden implement a capital hill dropping and a continuous row seeder with the most perfect and complete wheel hoe, cultivator, rake and plow that the most practical can desire. Designed by a practical man, it is light, compact, durable and easy running, and does all its great variety of work with a thoroughness and perfection that has never before been attempted much less equalled.

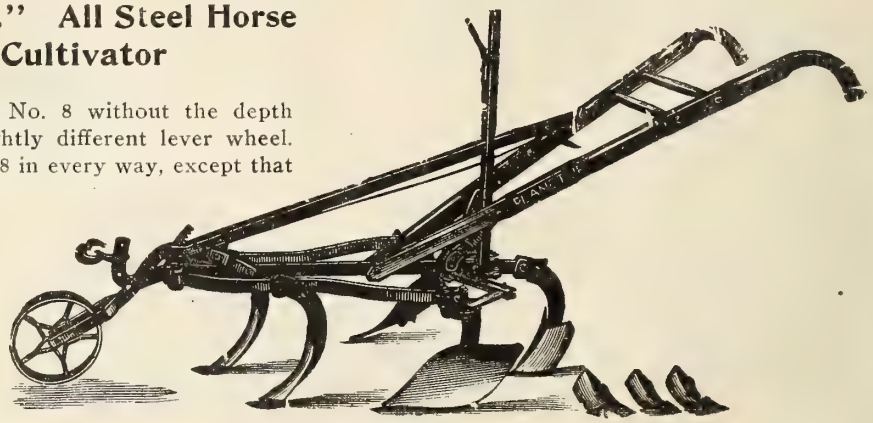


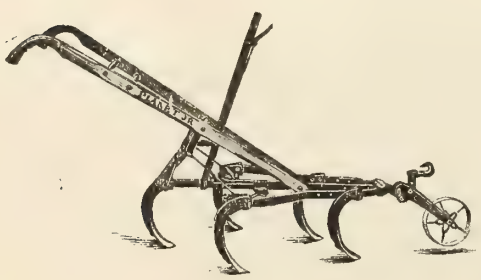
No. 7 "Planet Jr." All Steel Horse Hoe and Cultivator

This horse hoe is the No. 8 without the depth regulator and with a slightly different lever wheel. It works the same as No. 8 in every way, except that it lacks the perfect steadiness and absolute control of depth made possible by the depth regulator.

No. 7 HORSE HOE,

Price with attachment as in cut, $8.50.





No. 8 "PLANET JR." same as No. 7 with addition of depth regulator.

Price $9.00

No. 9 "PLANET JR." ALL STEEL HORSE HOE AND CULTIVATOR.

Practically the same implement as No. 7, except wheel lever; it is our leader.

Price $7.50

"PLANET JR." No. 12

Double Wheel Hoe, Cultivator and Plow.

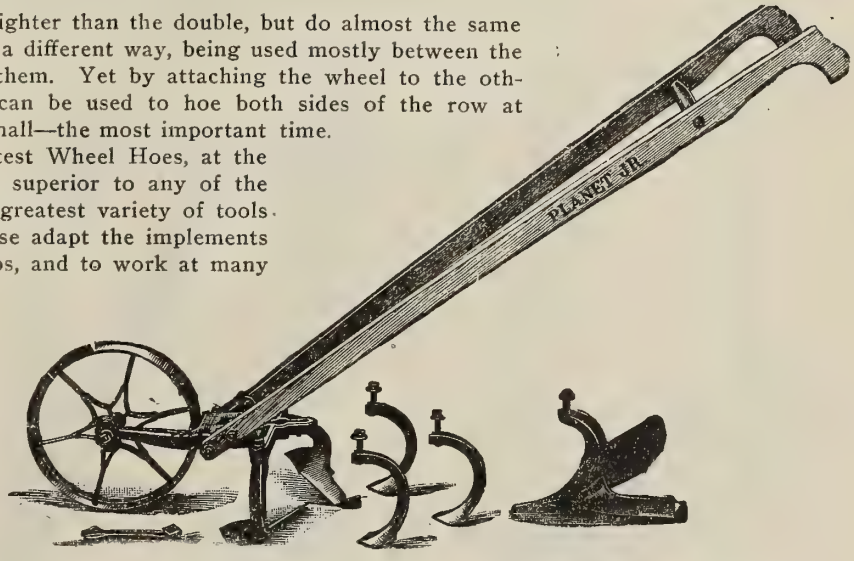
The "Planet Jr.," Double Wheel Hoe is a great favorite, especially for field work. **It hoes both sides of the row at once at the speed of a moderate walk.**

A wheel hoe should be double or **at least** be capable of hoeing both sides of a row at one passage. Any inequalities can be accurately followed when straddling but one row, while between two the tool must work the narrowest points, and therefore be quite too narrow for the wider parts; nor can a person watch tow rows and work them as closely as one, even if planted accurately.

No. 12.—Price.....$7.35

No. 13.—Double Wheel with Hoes and Wrench. Price..$5.00

"PLANET JR." No. 17, CULTIVATOR and LARGE GARDEN PLOUGH. SINGLE WHEEL HOES



SINGLE Wheel Hoes are lighter than the double, but do almost the same variety of work, though in a different way, being used mostly between the rows instead of straddling them. Yet by attaching the wheel to the other side of the arm, No. 17 can be used to hoe both sides of the row at once while the plants are small—the most important time.

For **1908** we offer our latest Wheel Hoes, at the highest type of their class, superior to any of the old styles. They have the greatest variety of tools we have ever offered. These adapt the implements to a greater variety of crops, and to work at many different distances apart; there is scarcely any garden culture of which they are not capable.

The Handles are adjustable in height. The frame is convenient and strong, with quick change device, which permits the tools to be changed without removing the nuts. This device is used on both our double and single wheel hoe frames. **The Wheel** can readily be changed in height and to the far side of the frame to hoe "both sides at once."

No. 17.—PRICE, Complete..... **$5.25**
No. 16.—Combined Cultivator, Plow and Rake..... **$6.00**
No. 18.—Single Wheel Hoe with Hoes and Wrench **$3.75**

THE "PLANET JR." TWELVE-TOOTH HARROW WITH No. 9 WHEEL

Cultivator and Pulverizer. Plain, $6.00; With Wheel, $6.75; Complete, $9.00

This tool has grown remarkably in favor owing to its neatness and perfect work.

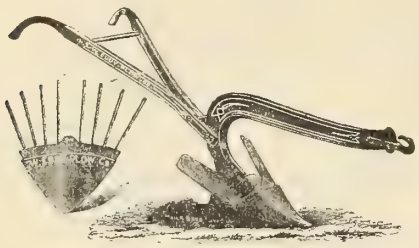
THE FARMER uses it in deep or close cultivation of potatoes, corn, etc., when small, or when desiring to work the crop thoroughly without filling.

THE STRAWBERRY GROWER, to keep the ground loose and to work up and bed the runners; the round-throated teeth lift them and turn them aside without injury; ready to root the mellow soil, which is thoroughly prepared by the numerous small teeth. The Bean Raiser uses it while the crop is small with the greatest satisfaction and benefit, and all through the system it is invaluable.

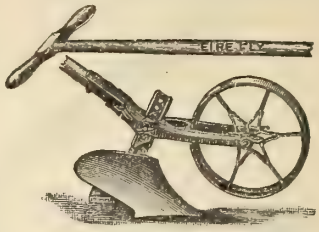
THE MARKET GARDENER finds it the most useful one-horse tool he owns, it narrows in an instant or widens. Cuts deep or shallow, is thorough but gentle in its action, steady running, and is useful everywhere.

MITCHELL POTATO DIGGER AND SHOVEL PLOW COMBINED.

Price, with Wings only.....$5.00
" Potato Digger..... 6.00
" Wings and Potato Digger attachment 7.98



FIRE-FLY GARDEN PLOW.



Price, $2.25.

Packed weight 13 lbs.

This implement should be in the hands of every practical farmer, doing its work easily and in the most perfect manner. By the changing of one bolt it may be converted into a **SHOVEL PLOW**, or **POTATO DIGGER.** The fingers are adjustable, being held in position by the plow point. Thus, in case of breakage, a new part may be inserted without the expense of a whole new head. The fingers, points and wings are made of steel, rendering it light, strong and durable.

THE "BOSS" PLOW.

This is the best one-horse convertible plow ever sold for the use of market gardeners and farmers generally. By changing the Moldboards and Shears that come with the plow, the purchaser actually has four plows in one.

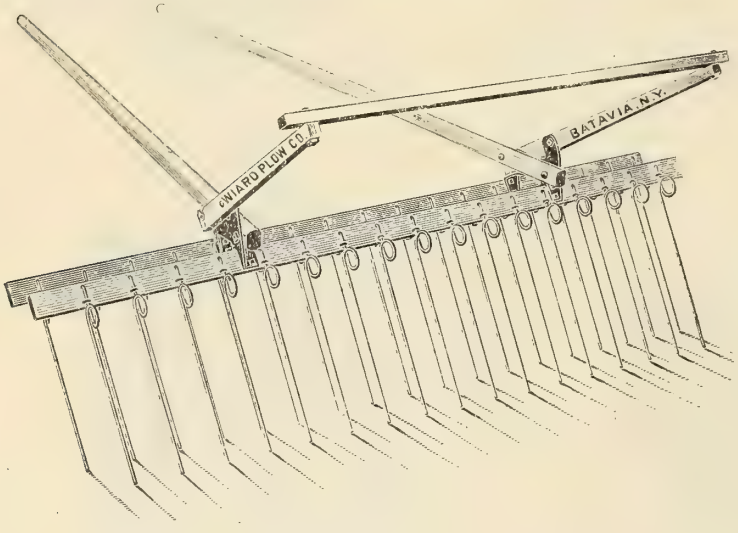
Wiard Adjustable Weeder



Price, $7.50

The Wiard Adjustable Weeder

1900 Pattern.

Used more especially on planted crops in early spring, but very useful for grain fields when hard and dry, or kacked by rain.

Surface weeds are entirely destroyed, while the crop, being planted deeper, is not disturbed, but its growth increased by the loosening and pulverization of the soil.

The Weeder is 7½ feet wide, and has 35 spring-steel teeth, which may be adjusted to stand straight or sloping, adapting it to all kinds of soil.

The use of the Weeder proves correct the theory that the more elastic the teeth, and the greater the vibratory motion, the better the result; and these qualities, contained in the Wiard far more than in any other, give it the highest efficiency for the work intended, and render it one of the most valuable labor-saving implements that can be placed on the farm.

The "Star"

R. F. D. Mail Boxes

Approved by Postmaster-General.

High Grade Boxes at Reasonable Prices, that will please both the dealer and user. No solder or rivets are used in their manufacture, all joints being made by special machinery, leaving seams smooth and sightly and without rough edges.

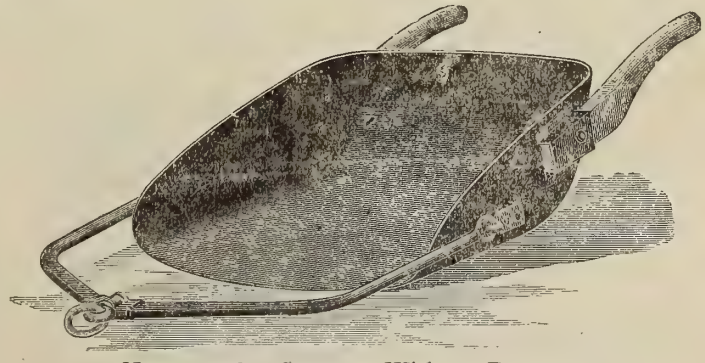
THE "BOSS" SOLID STEEL DRAG SCRAPER.

Pat. Nov. 4, 1897, and Mar. 24, 1885.

Best and Cheapest Scraper in the Market.

No. 1. Capacity 7 cubic feet....$7 00
No. 2. Capacity 5 cubic feet.... 6 50



Nos. 1 and 2 Scrapers Without Runners.

These Scrapers are made from heavy plates of especially hardened steel, and are stamped from one sheet without joint, seam or rivet. They are superior to any other Drag Scraper upon the market, the "Columbus" Solid Steel Scraper alone excepted. The bowl being made of thicker and harder steel, enables it to scour where no other Scraper will; and owing to the sharp, rounded nose, it will enter the ground more rapidly than any other make of Scraper. The Balls are steel, with perfect working swivels, and handles of hard wood. We will guarantee this Scraper in every particular. Made in three sizes.

25 lbs	$1.00
Rose Nicotine Liquid, bottle	25c
Rose Nicotine Fumigator, bottle	25c

Double Ground Land Plaster, per 100 lb. bag 50c

White Hellebore. An excellent remedy against currant worms, rose slugs, caterpillars, etc. Can be used either dry or in water, 15c. per pound.

Whale Oil Soap. One of the most effective agents used for destroying scale bug, plant lice and all other insects injurious to vegetation. Price, 1 lb. box, 15c. 2 lb. box, 25c.

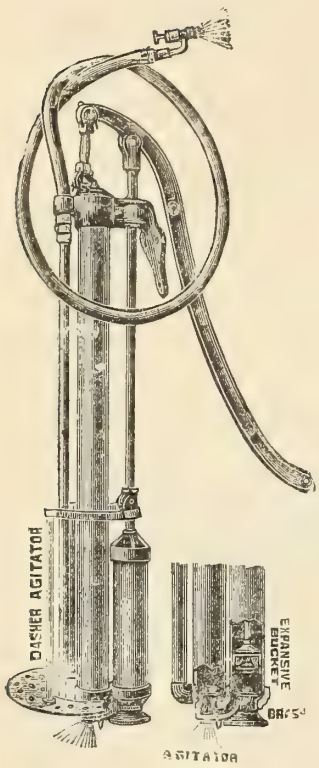
Standard Fly and Germ Killer. It is a thorough disinfectant and germicide. Protects horses and cows from the torture of flies. The **Lightning Insect Exterminator No. 1** discharges the preparation in a fine, broad spray, without waste and using but very little. Fifty cows can be sprayed in a few moments, 60c. per gallon.

Horicum, the Great Scale Killer. A remedy for the Scale that is the result of six years' experiment before being put on the market. Nothing better in use for the purpose. One gallon will make 21 gallons for use. 35c. per quart; $1.00 per gallon.

Sulphur, Powdered. A remedy for insects of all kinds, both by itself and in combination with other remedies. Market rates.

Hammond's Slug Shot is an insecticide for the destruction of Potato and Rose Bugs, and all Lice, Worms or Caterpillars upon Melons, Egg, Cucumber, Cotton, Tobacco and Cabbage plants, Tomatoes, Currants, Fruit or Ornamental Trees, Grape Vines(Shrubs and Flowering Plants. 5 lb. pkg., 25c.

Strictly Pure Paris Green. Market price.



Pump No. 25
Price $6.98.

"Fruitall" Spray Pump. "Fruitall" Spray Pump is made on the same general lines as the famous "Pomona;" it is, however, lighter and of smaller capacity. All working parts, including plunger, gland, valves, valve seats and strainer are made of bronze. Regularly fitted with wing agitator similar to one used on "Pomona," and which has proven to be the best type. Not made for side of barrel. Price, with hose complete, no barrel, $12.00.

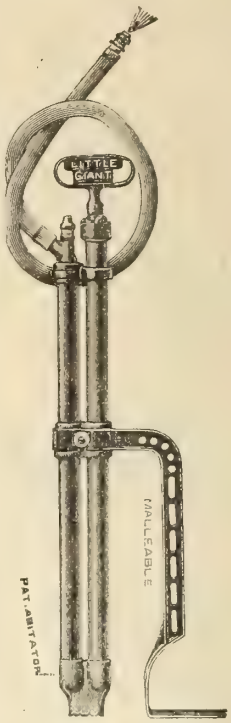
"Premier" Brass Bucket Pump.

"Premier" is arranged with suction and discharge hose and spray nozzle. With this nozzle a solid stream may be thrown, or a fine spray. Pump has brass cylinder, plunger and rod. It is particularly adapted for washing windows and wagons, spraying plants in conservatories, green houses, etc. Its weight is only eight pounds.

Price, with 2½ feet ¾ inch suction and 3 feet ⅜ inch discharge hose, "Seneca" Spray Nozzle and Strainer, $5.98.

Lightning All Brass Spray Pump.

This spray pump is constructed entirely of brass, so it is not affected by the arsinates used for spraying fruit trees, etc. The operator is enabled to keep a constant pressure of 50 to 100 pounds at the nozzle with very ordinary exertion. Will throw a solid stream 50 feet, or make a fine spray by adjustment of the nozzle. When spraying, a fine jet at the bottom keeps the solution thoroughly stirred. Price $3.50. See cut.



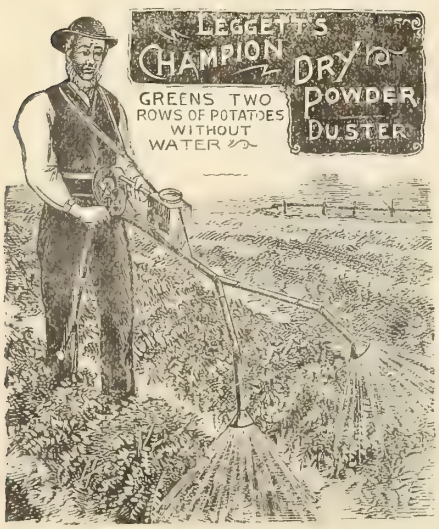
Lightning All Brass Spray Pump
Price $3.50.

LIGHTNING BARREL SPRAY PUMP No. 25.

This pump has great capacity, and will throw a continuous stream, or any sized spray desired, by the use of our graduating nozzle. The air is compressed into the air chamber, thereby giving an unbroken stream, and making it the most rapid spraying pump made. The agitator thoroughly stirs the liquids and prevents the same from settling. It is adapted for all kinds of spraying, whitewashing, etc. Price, $6.98. (See cut.)

"LIGHTNING" WHITEWASH SPRAYER.

This is the only Sprav Pump that will properly spray whitewash without clogging. It is constructed of heavy galvanized iron, with brass tops and valves. Large air chamber and ball valves, the pressure maintaining a continuous stream or spray not affected by the upward stroke. Can also be used for washing windows, buggies and sprinkling lawns, flowers etc. Galvanized iron, $2.50; brass, $3.50.



Price $7.50.

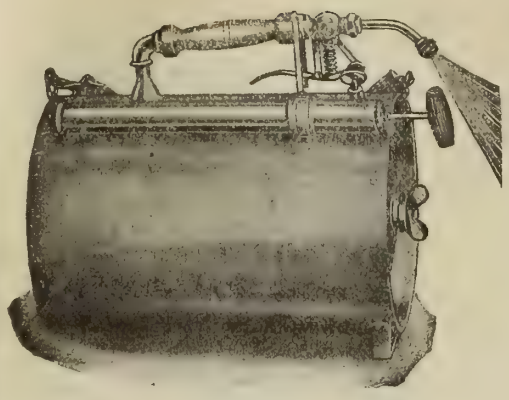
GLASS TANK SPRAYER.

A general utility sprayer, adapted to all liquid Disinfecting and Poison Preparations for Orchard, Field and Garden, as well as for use on Cattle, Horses, Sheep, Swine and Poultry.

Capacity One Quart. **Price 60 cents.** **1908 Pattern.**

CHAMPION DRY POWDER GUN.

For applying dry Paris Green, Hellebore, etc., to plants and trees, the powder being evenly distributed over a wide space with the least possible waste. The quantity may be regulated as desired. Price $7.50.



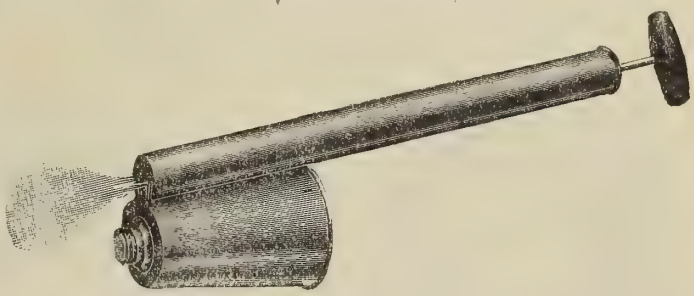
Does not require constant pumping. Has an automatic thumb lever valve. Most practical for Orchard, Field and Garden work.

"POMONA" SPRAY PUMP.

"Pomona" Spray Pump has great power and capacity. No leather packings. All working parts are bronze, including plunger, gland, valves, valve seats, &c. Plunger is outside packed. **Valves are easily accessible for examination.** Air chambers are steel. Powerful lever with adjustable stroke. Pump projects but little above the top of the barrel. Price with Barrel and Hose complete, $20.00.

The Lowell Fountain Compressed Air Sprayer. One pumping will expel entire contents of tank and is sufficient to spray 2,000 plants. Spraying nozzle may be reversed to spray under side of bushes and plants. The Automatic Thumb Lever Valve is at all times under complete control of operator—hence none of the solution is wasted. It saves its cost in making a given amount of compound do so much more work. An Adjustable Shoulder Strap and Tree Attachment with suitable couplings for orchard and tree spraying, furnished with each machine. Aluminum finish. Capacity 3 Gallons. Price $4.98.

The "Lowell" Blow Powder Sprayer is fitted with a Ball Valve which is positive in its action, preventing any powder being drawn back into the pump—thus insuring at all times a perfect working machine. The powder can holds one quart and has a two inch screw cap opening in back for filling. Adapted to Paris Green, Slug Shot, Bug Finish, Lice Powder and all Dry Powder Disinfectants and Poisons. Aluminum finish. **Caution:**—Powder must be thoroughly dry. Price 50c.



Water Witch.

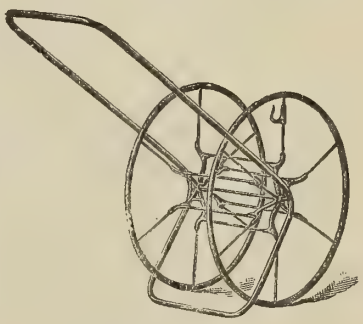
All grades Garden Hose, from 8c. per foot.

Hose Nozzles, Hose Couplings, Hose Bands and Hose Menders for Repairing your old Hose.

The Sprinklers mentioned below can be attached to our Hose, for which purpose we supply Free one pair of couplings to every 25 or 50 feet of Hose purchased.



$2.75.

THE "WATER WITCH" LAWN SPRINKLER.

In constructing this device the main object was to produce a sprinkler that would scatter the water **more evenly** and over a **larger area** than would any other sprinkler. This purpose has been fully realized in the **"Water Witch."**

The water flows through the nozzle with **unimpeded** force, and is divided and deflected by the two lips of the swivel piece, which it causes to revolve rapidly scattering the water in **fine drops and evenly** over a circular area of **twenty-five** to **forty** feet diameter. No. 3. Price 48c.

Mayflower Lawn Sprinkler. A perfect revolving three-arm Sprinkler that will cover a space thirty or forty feet wide.....$0 89

Flower and Clothes Sprinklers. 35 cents. **Dahlia Poles,** 2, 3, 4, 5 and 6 feet.

THE BLANCHARD CHURN

The body of the Churn being Cylindrical, all the cream is churned alike and at the same time making streak butter impossible. Those who desire to make butter on what is called the "granular system" can do it perfectly with the Blanchard Churn. If we were disposed to follow the example of some of our competitors, we could add page after page of "unsolicited" testimonials as to the accuracy of these claims; but we simply point to our past record and to the absolute guarantee under which all our sales are made.

High-Grade POULTRY ...AND... PIGEON SUPPLIES

Our Poultry foods are all manufactured from sound and wholesome grains and seeds. No waste by-products or inferior material of any kind are used in their manufacture. The **Best** Poultry supplies are really the cheapest, the best suited for the taste, the best calculated to bring you success. In no line of work is this more true than in poultry raising.

CHICK STARTER

A Primary Food for Chicks up to Three Weeks Old.

A high grade mixture of sweet, sound recleaned cracked grains and seeds so proportioned to the needs of the growing chick that it will be fully nourished. Similar to Chick Food, but graded smaller.
50 lb. Bag at $1.55. 100 lb. Bag at $2.75.

Crescent Chick Food.—A Complete Chick Food up to Eight Weeks Old.

Crescent Chick Food is a mixture of many different grains and seeds, best adapted to chick feeding, always ready, no waste no dirt, the product of flesh and muscle forming element, is maintained to a high degree to supply the needs of the rapidly growing bird.
50 lb. Bag at $1.50. 100 lb. Bag at $2.50.

Developing Food.

A special food for properly maturing young chicks after they are weaned from Chick Food up to the time for feeding scratching food and laying food. Developing food is dry grain and may be fed from hoppers, but better results may be had by scattering broad cast.
50 lb. Bag at $1.50. 100 lb. Bag at $2.50.

Queen Poultry Mash.

A carefully selected mixture of ground feed made from the choicest sound, sweet and wholesome grain. It is carefully prepared and contains ingredients in proper proportions essential to the health and growth of the fowl and especially for the production of eggs.
50 lb. Bag at $1.50. 100 lb. Bag at $2.50.

Laying Food.

A ground food ready for the mash made up of carefully selected materials that will greatly increase the production of eggs. The use of this food would greatly increase the profits of the poultry raised and cannot be too highly recommended. **50 lb. Bag at $1.30. 100 lb. Bag at $2.30.**

Scratch Food.—For Grown Fowls, Suitable at all Seasons.

A carefully selected and mixed balanced ration of grains, cracked and whole seeds, etc., adapted to the vigorous growth of fowls and production of eggs. Scratching food should be scattered in the litter the first thing in the morning and at noon, late in the afternoon feed all the mash food they will clean up. **50 lb. Bag at $1.15. 100 lb. Bag at $2.00.**

Beef Scrap.—Standard Meat Food for Poultry of all Ages.

High Protien Beef Scraps is an especially valuable meat food for poultry and gives very satisfactory results. Any kind of Beef Scraps will not answer. Poor Beef scours the birds and ofter injures them, when the first is used the results are uniformly good. Do not fail to buy your supply from a reliable source. **100 lb. Bag at $3.25.**

Pigeon Food.

A properly balanced mixture of a number of grains and seeds so proportioned as to keep the old birds in good condition and help the young ones grow strong and healthy. Nothing but the highest quality of grains and seeds are used. There is no waste to our Pigeon Food. The birds eat it up cleanly. Prices, 50 lb. bag, $1.50; 100 lb. bag, $2.50.

Charcoal.

Prepared expressly for Poultry, absolutely pure, essential to health of Fowls and aids to digestion. 1 lb., 5c.; 5 lbs., 20c.; 10 lbs., 30c.; 25 lbs., 63c.

Ground Bone. Fine and Granulated.

Ground Bone is made from the Dry Bone and contains Phosphates, Lime and Protien and is especially valuable as an egg shell producer. 5 lbs., 25c.; 10 lbs., 40c.; 25 lbs., 88c.; 100 lbs., $2.75.

Cut Alfalfa Clover.

A Poultry Food that aids digestion and assists in the assimilation of grain foods, thereby giving better results at lower cost. Among green foods, Alfalfa stands at the top. When fed it should be scattered and left for the fowls to eat at will. 5 lbs., 20c., 10 lbs., 35c.; 25 lbs., 75c.; 50 lbs., $1.25.

Alfalfa Meal.

Mealed Alfalfa is a boon to poultrymen. It is used in a mash for small chicks as well as to mature fowls. If more of this meal was fed to young chicks there would be less mortality.
5 lbs., 20c., 10 lbs., 35c.; 25 lbs., 75c.; 50 lbs., $1.25.

Cut Red Clover.

Cut Red Clover used same as cut Alfalfa, and is regarded by some as of similar value.
5 lbs., 20c., 10 lbs., 35c.; 25 lbs., 75c.; 50 lbs., $1.25.

Crushed Oyster Shells.

It is needless for us to enlarge on the value of Oyster shells for poultry. Every poultryman realizes their importance as an egg shell maker and general promoter of good health. 100 lb. bag, 60 cents.

Crystal Grit.

We supply 4 sizes of Grit. No. 4 for Brooder Chicks; No. 3, for Pigeons; No. 2 for half grown Chicks; No. 1 for Hens, Turkeys, Ducks and Geese. 100 lb., Bag, 75 cents.

Seeds and Grains.

We carry a full line of the following: Wheat, Barley, Millet, Hemp, Sunflower, Kafir Corn, Canadian Peas, Cracked Rice, Linseed Meal, Canary Seed and Mixed Bird Seed, Buckwheat, Rye, etc.

Price 50c.

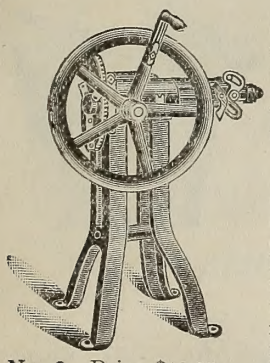
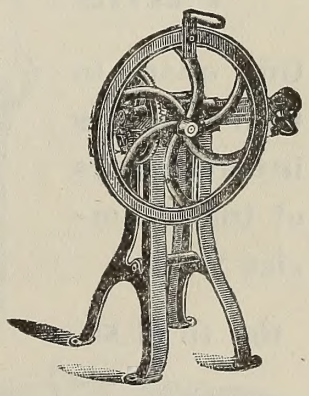
Standard Green Bone Cutter.



No. 8 Price $10.50

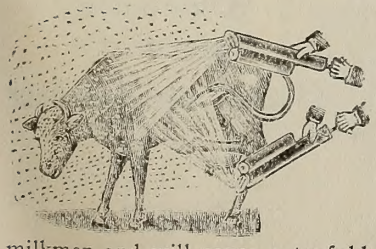
The Standard Automatic Feeding and Automatic Stop Green Bone Cutters are the only machines manufactured that will do the work properly, easily, scientifically. They save time and labor over all other machines. They supply the bone cut in the very best size and shape, to be assimilated by the fowl.

Our patent, positive automatic feed is so constructed that the product will be cut fine enough for chickens. This valuable device relieves the operator of all responsibility, allows him the use of both hands and permits him to devote his entire attention to the operation of the machine. Our patent, automatic stop releases the feed screw when the bone in the cylinders is all cut, unlocks and withdraws the feed pressure, and the machine may still continue in operation without injury.



No. 3. Price $17.75.

Standard Fly and Germ Killer.



Protects Cows and Horses from the torture of flies. It is a comfort to Cows and milkmen and will cause a tenfold increase in the amount of milk. It is a liquid preparation designed for keeping flies from stock and is perfectly harmless. Put up in one gallon jugs, 60c. per gallon.

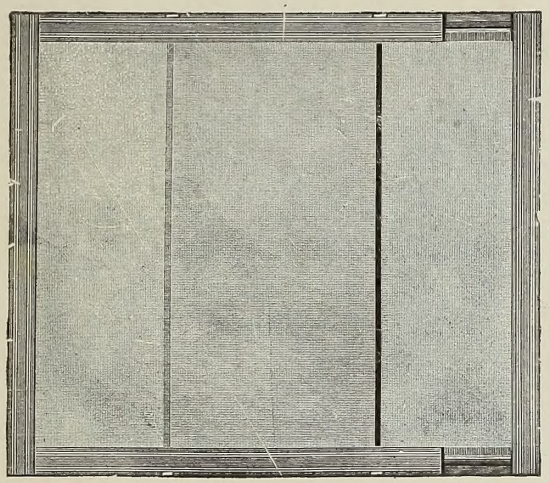
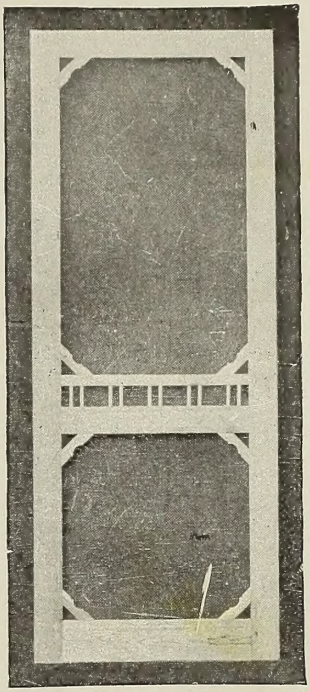
WINDOW SCREENS AND SCREEN DOORS.

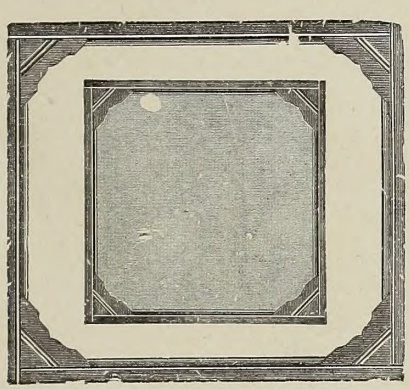




Porter Flyer Window Screens. These are a great improvement upon the ordinary adjustable screens, having a strip of steel on the inner edges of the sections, thus keeping them close together, whether opened to widest extent or only part the way, absolutely preventing the entrance of insects.

Window Screen Frames, 25 cents up.

Our Fancy Screen Doors are handsome in design, being the result of study and combination. Without being overloaded with ornament, they are always pleasing to persons of correct taste. They are strongly and carefully made from selected materials, glued together with the long corrugated dowels. 98 cents up.



Sherwood All-Metal Screen. A great improvement over wooden frame Window Screens. All metal securely locked, preventing any sagging of wire. Can be used as adjustable or stationary screen—adjustment can be quickly made. 50 cents each.

Vudor Porch Screens. They protect you from the sun, but the breeze passes through them. You see but you are not seen. They will last for years, but are cheap in price. They can be raised and lowered instantly and will remain at any point. It does not require a carpenter or awning man to put them up. You or your man can put them in position in a few minutes.

Tents. We handle a line of Tents suitable for all purposes, made of Army duck plain white and assorted stripes, from 5x5 feet upwards in size, complete with center pole and all attachments. Prices from $4.50 up

Wood Framed Screen from 10 cents up.
